- (a) The Company’s future success is dependent upon its ability not only to identify opportunities but also to execute a successful Acquisition. The Company has not yet

identified any potential investment targets, and there may be significant competition in some or all of the Acquisition opportunities.

- (b) The Company may not be able to complete an acquisition in timely manner or at all or fund the operation.
- (c) The Company is dependent on the Directors and its advisors to identify potential acquisition opportunities and the loss of the services of the Directors or any advisor could materially adversely affect the Company's strategy or ability to deliver upon it in a timely manner or at all.
- (d) The Company may need to raise substantial additional capital in the future to fund any Acquisition and future revenues, taxes, capital expenditures and operating expenses will all be factors which will have an impact on the amount of additional capital required. Any additional equity financing may be dilutive to Shareholders and debt financing, while widely available, may involve restrictions on financing and operating activities. The Company may also incur substantial expenses arising from unsuccessful transactions which may have a material adverse effect on the Company, and it may need to seek substantial additional funding to implement its strategies and taxes, which may well comprise new equity issuance.
- (e) The Company does not have a track record of trading activities, being a newly incorporated company, and therefore investors have no basis on which to evaluate the Company's ability to achieve its objective of identifying, acquiring and operating a company or business.
- (f) There may be significant competition in some or all of the acquisition opportunities that the Company may explore, which may cause the Company to be unsuccessful in executing an Acquisition or may result in a successful Acquisition being made at a significantly higher price than would otherwise have been the case.
- (g) The Company will carry out a full due diligence exercise in relation to a potential Acquisition and may be required to rely on public information or information provided by the vendor. Such investigations may fail to reveal or highlight relevant facts.
- (h) The Company currently has no assets producing positive cash flow and its ultimate success will depend on the Directors' ability to implement the strategy outlined in this Prospectus, generate cash flow from the Company's potential investments and access equity and debt financing markets as the Company grows and develops. Whilst the Directors are optimistic about the Company's prospects, there is no certainty that anticipated outcomes and sustainable revenue streams will be achieved.
- (i) The Company may be subject to risks particular to one or more countries in which it ultimately operates following an Acquisition, including regulatory compliance risks and foreign investment and exchange risks.

3. KEY INFORMATION ON THE SECURITIES

On Admission, the Ordinary Shares will be registered with an ISIN of GG00BPG8J619 and SEDOL of BPG8J61. It is expected that the Ordinary Shares will be traded on the main market for listed securities of the London Stock Exchange under the ticker symbol "IKIV".

3.1.2 Currency, denomination, par value, number of securities issued and term of the securities

The Ordinary Shares are and, on Admission will be, denominated in UK pounds sterling. On Admission, the number of the Ordinary Shares in issue will be 20,680,000. The Ordinary Shares have no par value and will be fully paid.

3.1.3 Rights attaching to the securities

All Ordinary Shares will rank *pari passu* in all respects, there being no conversion or exchange rights attaching thereto, and all Ordinary Shares will have equal rights to participate in capital, dividend and profit distributions by the Company.

On a show of hands every Shareholder who is present in person and every person holding a valid proxy shall have one vote and on a poll every Shareholder present in person or by proxy shall have one vote per Ordinary Share.

3.1.4 Rank of securities in the issuer's capital structure in the event of insolvency

Not applicable. There is no difference in seniority between the Ordinary Shares.

3.1.5 Description of restrictions on free transferability of the securities

The Ordinary Shares are freely transferable and there are no restrictions on transfer, subject to compliance with applicable securities laws.

3.1.6 Dividend policy

The board of directors of the Company (the “**Board**”) recognise dividends to be an important component of total shareholder return. The Company’s present aim is to retain earnings (if any) for future use within its business operations. The Board does not have plans to declare any dividends prior to any Acquisition. Upon the occurrence of an Acquisition, the Board will keep under review the desirability of paying dividends when it becomes commercially prudent to do so.

3.2 **Where will the securities be traded?**

Application will be made for all the Ordinary Shares to be admitted to the Official List maintained by the FCA (by way of a Standard Listing under the Listing Rules) and to trading on the London Stock Exchange’s main market for listed securities. No application has been made or is currently intended to be made for Ordinary Shares to be admitted to listing or trading on any other exchange.

3.3 **What are the key risks that are specific to the securities?**

- (a) There is no existing market for the Ordinary Shares and an active trading market for the Ordinary Shares may not develop or be sustained following Admission, which would adversely affect the liquidity and price of the Ordinary Shares.
- (b) A suspension or cancellation of the Ordinary Shares, as a result of the FCA determining that there is insufficient information in the market about an acquisition or a target, would materially reduce liquidity in such shares, which may affect investor’s ability to realise some or all of its investment.
- (c) It will be necessary for the Company to reapply for re-admission of the Ordinary Shares following completion of an acquisition constituting a Reverse Takeover. A cancellation of the listing of the Ordinary Shares by the FCA would prevent the Company from raising equity finance on the public market, or carrying out a further acquisition using share consideration, restricting its business activities and resulting in incurring unnecessary costs.
- (d) The Controlling Shareholder will retain significant interests in, and will continue to exert substantial influence over, the Company following Admission and his interests may differ from or conflict with those of other Shareholders, albeit the Relationship Agreement will take effect on Admission.
- (e) Future sales of shares, the possibility of future sales or issues of a substantial number of new Ordinary Shares, including as consideration for an investment or acquisition, could have an adverse effect on the price of the Ordinary Shares, and the issuance of additional Ordinary Shares may well dilute the interests of current Shareholders.

- (f) A Standard Listing will afford investors in the Company a lower level of regulatory protection than that afforded to investors in a company with a Premium Listing.

4.2 Why is this Prospectus being produced?

Reasons for the Placement and use of proceeds

The Company is conducting the Placement to:

- benefit from the public profile of a listed company, thereby promoting the Company and its strategy;
- provide the Company potential liquidity offered by a Standard Listing; and
- permit the ability to issue listed equity as consideration for Acquisition, if necessary.

It is intended that the operating costs of running the business prior to its first acquisition will be kept to the minimum required commensurate with full compliance of the Listing Rules and other regulatory requirements and at all times with good corporate governance.

The Company intends to prioritise the proceeds of the Placement as follows:

- to pay the costs of Admission to its advisors;
- to pay for the costs of due diligence associated with any Board approved potential Acquisition; and
- to pay towards the costs of re-admission on an Acquisition.

In the course of negotiations with a potential target, the Company may agree to fund all or part of the cash costs associated with the preparation of materials for legal, accounting and other costs.

In certain circumstances, where the Board considers it to be advantageous to its Shareholders, the Company may agree to advance some of its initial capital to a potential target prior to the completion of an Acquisition. The costs and consequences of making any such advance will be weighed by the Board in arriving at their determination.

To the extent that the initial capital remains unused at the time of Acquisition, the Company intends to use such surplus capital to contribute to any cash consideration paid to the sellers of a target business and/or for general working capital of the enlarged business. Consideration for an Acquisition is likely to be by way of a new issue of Ordinary Shares to the vendors, or cash funded through the issue of new Ordinary Shares to acquire the target business.

4.3 **Material conflicts of interest**

General

Although the Board is confident that there are no immediate conflicts of interest between any duties owed to the Company by the Directors, Andrew Roberto Mankiewicz OBE and their private interest or other duties, however, it should be noted that each Director and Mr Mankiewicz holds multiple directorships. If there is a conflict of interest the Articles provide for how the Board are to manage and deal with conflicts of interest.

Conflict of interest with respect to Directors

Other than as disclosed above, there are no other conflicts of interest to note.

Conflict of interest limitation

The Company, Board and Mr Mankiewicz will, wherever possible, try to ensure that a conflict of interest does not arise. The Company's practises in managing conflicts of interest enables the Company to identify and document conflicts of interest on an ongoing basis and includes controls, such as documented investment and review processes, to manage any such identified conflicts.

The Company and its senior management will seek to mitigate or resolve any conflict of interest that has been identified and will take appropriate action to do so. This may involve the implementation of additional control measures. Conflicts of interest that are of an ongoing nature are reviewed by the non-executive directors as part of their ongoing monitoring responsibilities.

The Company has also entered into a Relationship Agreement with Mr Mankiewicz under which he has undertaken to conduct himself in certain ways for such time or times as his voting right represents 30 per cent. or more of the right to vote at a general meeting of the Company.

PART 2

RISK FACTORS

Investing in and holding Ordinary Shares involves financial risk. Prior to investing in the Ordinary Shares, prospective investors should consider carefully the factors and risks associated with any such investment in the Ordinary Shares, the Company's business and the industry in which it operates, together with all other information contained in this Prospectus (including, in particular, the risk factors described below).

Prospective investors should note that the risks relating to the Company its business and industry and the Ordinary Shares summarised in Part 1 (Summary) of this Prospectus" are the risks that the Directors believe to be the most essential to an assessment by a prospective investor of whether to consider an investment in the Ordinary Shares. However, as the risks which the Company faces relate to events, and depend on circumstances, that may or may not occur in the future, prospective investors should consider not only the information on the key risks summarised in Part 1 (Summary) of this Prospectus but also, among other things, the risks and uncertainties described below.

The risks and uncertainties described below represent those that are known to the Directors and which they consider to be material as at the date of this Prospectus. However, the risks and uncertainties described below do not comprise an exhaustive list and do not necessarily include or explain all of the risks associated with the Company, its business and the industry within which it operates and should be used as guidance only. The order in which risks are presented is not necessarily an indication of the likelihood of the risks actually materialising or of the scope of any potential harm to the Company's business, prospects, results of operation and/or financial position.

Additional risks and uncertainties not presently known to the Directors, or that the Directors currently consider to be immaterial, may individually or cumulatively also have a material adverse effect on the Company's business, prospects, results of operations, financial position and/or the price of the Ordinary Shares. If any or a combination of these risks actually occurs, the business, prospects, results of operations and/or financial position of the Company's business could be materially and adversely affected. In such case, the market price of the Ordinary Shares could decline and investors may lose all or part of their investment. Investors should consider carefully whether an investment in the Ordinary Shares is suitable for them in the light of the information in this document and their personal circumstances.

RISKS RELATING TO THE COMPANY'S BUSINESS STRATEGY

1. The Company's future success is dependent upon its ability not only to identify opportunities but also to execute a successful Acquisition

The Company's success is dependent upon its ability to identify opportunities and also to execute a successful Acquisition. The success of the investment objectives depends on the Directors' ability to identify investments in accordance with the objectives, to interpret market data and predict market trends correctly and to negotiate and conclude an Acquisition successfully. No assurance can be given that the strategy to be used will be successful under all or any market conditions or that the Company will be able to identify and execute an Acquisition or that such Acquisition will generate positive returns for investors. There is also no assurance that the Company will be able to conclude agreements with any target business and/or shareholders in the future and failure to do so could result in the loss of an investors' investment.

2. The Company may incur substantial expenses arising from unsuccessful transactions which may have a material adverse effect on the Company

The Company's success is dependent upon its ability to identify opportunities but also to execute a successful Acquisition. There is a risk that the Company may incur substantial legal, financial, tax and advisory expenses arising from seeking and investigating ultimately unsuccessful transactions which could have a material adverse effect on the business, financial condition, results of operations and prospects of the Company.

3. The Company does not have a track record of trading activities

The Company has not, since incorporation, carried on any trading activities. The value of any investment in the Company is therefore, wholly dependent upon the successful implementation of its investment objective. Potential investors will be relying on the ability of the Company and the Directors to identify potential Acquisitions, evaluate their merits, conduct diligence and negotiations, raise any required

additional finance (if required), and execute any such Acquisitions. Ultimately any Reverse Takeover is going to be dependent not only on successfully identifying and negotiating an Acquisition, but also on raising the necessary funding, which will be highly dependent on the market at the time.

The Company is dependent upon the Directors to manage the Company's business. None of the Directors are required to commit any specified amount of time to the Company's affairs and accordingly, they may have conflicting interest in allocating time among their business activities.

The Company does not have key-man insurance on the lives of the Directors. The unexpected loss of the services of any of the Directors could have a material adverse effect on the Company's ability to identify potential acquisition opportunities and to execute an Acquisition.

4. The Company may need to seek additional sources of funding to implement its strategy

While it is expected that the Net Proceeds are sufficient to execute the strategy of identifying an acquisition target, it may be insufficient to fund in full a suitable Acquisition and/or investments identified by the Directors, and is unlikely to be sufficient to satisfy the working capital requirements of any target company that the Company acquires or invests in. Accordingly, the Company intends to seek additional sources of financing (equity and/or debt) to implement its strategy, and the completion of any Acquisition is likely to be contingent on the Company raising the necessary funds to satisfy any cash consideration and/or the working capital requirements of the Company and the target. There can be no assurance that the Company will be able to raise those funds, whether on terms acceptable to the Company or at all. Equity and/or debt financing could decrease investors' proportional ownership interests in the Company or have a material adverse effect on its financial condition and results of operation. However, nothing in this risk factor is intended to qualify the statement in respect of the Company's working capital in paragraph 14 of Part 13 (*Additional Information*) of this Prospectus.

5. The performance of sectors in which the Company intends to invest may be affected by changes in general economic activity levels which are beyond the Company's control

The performance of the ESG/social responsibility sector may be cyclical in nature, with some correlation to gross domestic product and specifically, levels of demand within targeted end-markets. As a result, the identified sector may be affected by changes in general economic activity levels which are beyond the Company's control but which may have a material adverse effect on the Company's financial condition and prospects. In particular, various strains of coronavirus, COVID-19, have quickly spread, resulting in severe illness and, in many cases, death and has been declared as a pandemic by The World Health Organisation. The COVID-19 pandemic may result in greater demand in certain sectors, and fewer opportunities in others. The Company has a broad investment strategy, which is not restricted by either sector or geographic focus. The COVID-19 situation is still rapidly evolving. It is therefore difficult to predict what impact COVID-19 may have on any potential investment. An adverse change in economic activity could have a material adverse effect on the profitability of the Company following an Acquisition.

The Company may Acquire or make investments in companies and businesses that are susceptible to economic recessions or downturns. During periods of adverse economic conditions, the markets in which the Company operates may decline, thereby potentially decreasing revenues and causing financial losses, difficulties in obtaining access to, and fulfilling commitments in respect of, financing, and increased funding costs. In addition, during periods of adverse economic conditions, the Company may have difficulty accessing financial markets, which could make it more difficult or impossible for the Company to obtain funding for additional investments and negatively affect the Company's net asset value and operating results. Accordingly, adverse economic conditions could adversely impact the business, development, financial condition, results of operations and prospects of the Company.

In addition, the political risks associated with operating across a broad number of jurisdictions and markets could affect the Company's ability to manage or retain interests in its business activities and could have a material adverse effect on the profitability of its business following an Acquisition.

There is also a risk that new economic, legal, social and tax policies may be introduced in certain countries under new national and regional administrations, including the United Kingdom, which could potentially have an adverse impact on the trading conditions for the Company.

6. The Company may acquire total voting control or acquire a non-controlling interest in a target company or business

The Company may either consider acquiring total voting control of any target company or business, or acquiring a non-controlling interest constituting less than total voting control or less than the entire equity interest of that target company or business if such opportunity is considered attractive or where the Company expects to acquire sufficient influence to implement its strategy. In such circumstances, the Company may have only a minority representation on the board of the target company, the remaining ownership interest will be held by third parties and the Company's ability to influence the commercial, strategic and operational decisions of the target board may be limited. Any third party's interests may be contrary to Company's interests.

7. Although the Company will conduct due diligence on potential Acquisitions to a level considered appropriate and reasonable by the Directors, material adverse issues may not be revealed

Prior to making or proposing any investment, the Company will undertake due diligence on potential Acquisitions to a level considered reasonable and appropriate by the Directors on a case by case basis. Any failure to reveal all material facts or circumstances relating to a potential investment or Acquisition that is ultimately concluded may have a material adverse effect on the business, financial condition, operations and prospects of the Company. Global border restrictions due to the COVID-19 pandemic may also lead to the Company not being able to make site-visits and conduct certain in-person due diligence interviews.

8. There may be borrowings in the target companies which the Company invests in

The companies or businesses in which the Company invests in may have borrowings. Although such facilities may increase investment returns, they also create greater potential for loss. In addition, a number of factors (including changes in interest rates, conditions in the banking market and general economic conditions), all of which are beyond the Company's control may make it difficult for the Company to obtain new financing on attractive terms or at all.

9. Implementing change programmes may require significant modifications to an acquired business

Implementing change programmes within an acquired business may require significant modifications, including changes to hardware and other business assets, operating and financial processes and technology, software, business systems, management techniques and personnel, including Directors. There is no certainty that the Company will be able to implement successfully such change programmes within a reasonable timescale and cost, and any inability to do so could have a material adverse impact on the Company's performance and prospects.

10. There is no assurance that any such acquired business will be cash flow positive

While the Company will undertake financial assessment of potential Acquisitions, following completion of an Acquisition, there is no guarantee that an acquired target will generate positive cashflow even if historically such entity has done so. In this event, the Company may need to spend unanticipated management time and/or further costs to try to improve the financial performance of such acquired businesses, and this may have an adverse impact on its own financial performance.

11. Historical results of prior investments made by, or businesses associated with, the Directors and their affiliates may not be indicative of future performance of an investment in the Company

The information set out in the biographies of the Directors in Part 8 (*Directors and Corporate Governance*) of this Prospectus is presented for illustrative purposes only and Investors are cautioned that historical results of prior businesses associated with, the Directors and their affiliates may not be indicative of the future performance of an investment in the Company or the returns the Company will, or is likely to, generate going forward.

In particular, the Company may be adversely affected by changes in economic, political, judicial, administrative, taxation or other regulatory factors, which did not impact on any of those prior investments.

12. There may be significant competition for some or all of the acquisition opportunities that the Company may explore

There may be significant competition for some or all of the acquisition opportunities that the Company may explore. Some of these competitors may be well-established entities which possess greater resources than the Company. Such competition may cause the Company to incur significant costs in investigating and performing due diligence on target acquisition but be unsuccessful in executing an Acquisition or may result in a successful Acquisition being made at a significantly higher price than would otherwise have been the case which could materially adversely impact the business, prospects, financial condition or operations of the Company.

13. There may be increased competition and unanticipated actions by customers, vendors or competitors in the industry

The Company will always be at risk that new entrants to the market are able to procure, by way of acquisition or licence, businesses which compete with the Company. Any new entrant in this space could have a disruptive effect on the Company and its ability to implement the investment objective and deliver significant value for shareholders. If any new entrant was able to establish a foothold in the market, this could have a corresponding negative effect on the financial prospects of the Company.

Following completion of an Acquisition, the purchase price of any raw products used or products distributed by the Company in its production processes could fluctuate, thereby potentially affecting the Company's results of operations. There could be significant increases in the cost of specific raw materials leading to a diminution in margins if substitute products need to be sourced from elsewhere. In addition, a period of commodity price deflation may lead to reductions in the price and value of the Company's products where sales prices are indexed or if competitors reduced their selling prices. If this was to occur, the Company's revenue and, as a result, its profits, could be reduced and the value of inventory held in stock may not be fully recoverable.

The environmental, social and governance market in which the Company and its proposed Acquisition targets will operate may be highly competitive with significant competition from large international producers and smaller regional competitors. The Company may lose market share to other producers or to other products that can be substituted for the products of the Company. Increased competition and unanticipated actions by competitors or customers, which could arise as a result of, among other things, unforeseen changes in the competitive landscape due to the introduction of disruptive technologies, could lead to an adverse effect on results and hinder the Company's growth potential. The Company may, where the Board decides it is necessary, invest in new facilities to allow it to maintain its key market positions. Following an Acquisition, the ability of the Company to compete in the sectors in which it invests will be dependent on its ability to develop technological innovations, to introduce new products and to protect its intellectual property, trade secrets and know-how. In addition, any failure by the Company to procure key raw materials may lead to production interruptions and volatility in the long-term prices of such raw materials and energy prices (including oil, natural gas and electricity) which may adversely affect the profitability of the Company and its working capital position. However, nothing in this risk factor is intended to qualify the statement in respect of the Company's working capital in paragraph 14 of Part 13 (*Additional Information*) of this Prospectus.

14. Financing risks

The Company cannot currently predict the period of time it will take to identify a suitable acquisition. If a target is not identified within 18 months of the Placement, further funds may need to be raised. The Company may not receive sufficient support from its existing Shareholders to raise additional equity, and new investors may be unwilling to invest on terms that are favourable to the Company, or at all. In the event that the Company pursues debt financing as a means to obtain additional financing, it may be the case that lenders may be unwilling to extend the debt financing to the Company on desirable terms, or at all.

In the event that funding is withdrawn prior to admission, and the fundraising target is not met the Company will not be able to cover its working capital demands and may withdraw its application for admission. Whether for this reason or simply if a target is not identified within 18 months of the Placement, it is the intention of the Directors that any remaining funds will be returned to investors, however, there can be no assurance as to the particular amount or value of the remaining assets at the time of any such distribution as a result of costs of the Placing or applicable tax liabilities. The investors are at risk of receiving less than the initial Price.

15. Risks relating to the ESG sector

The Company has not identified any target companies or businesses at the date of this Prospectus and, accordingly, the exact regulatory framework in which any target companies or businesses will operate is uncertain. To the extent a target company or business is operating principally in (or adjacent to) certain specific parts of the ESG sector, as applicable, the Company anticipates complying with the applicable regulatory framework following completion of an Acquisition and will ensure that it takes appropriate advice as part of the relevant diligence process in connection with such Acquisition. Regulatory requirements applicable to potential Acquisition targets will be considered on a case-by-case basis and the Company is committed to ensuring that it complies with all applicable regulatory requirements.

RISKS RELATING TO THE PLACEMENT AND THE ORDINARY SHARES

16. Investors may not be able to realise returns on their investment within a period that they would consider reasonable

Investments in Ordinary Shares may be illiquid. There may be a limited number of Shareholders and this factor, together with the number of Ordinary Shares to be issued pursuant to the Placement, may contribute to infrequent trading in the Ordinary Shares on the London Stock Exchange and volatile price movements. Investors should not expect that they will necessarily be able to realise their investment in Ordinary Shares within a period that they would regard as reasonable. Accordingly, the Ordinary Shares may not be suitable for short-term investment. Admission should not be taken as implying that there will be an active trading market for the Ordinary Shares. Even if an active trading market develops, the market price for the Ordinary Shares may fall below the Price.

17. The issue of additional shares in the Company as consideration for an Acquisition, or in connection with future growth opportunities, any share incentive or share option plan or otherwise will in certain circumstances dilute all other shareholdings

The Company may issue Ordinary Shares as consideration for an Acquisition, or to raise the funds necessary to pay any cash consideration for an Acquisition, or may seek to raise financing to fund other future growth opportunities. The Company may, for these and other purposes, such as in connection with share incentive and share option plans, issue additional equity or convertible equity securities. The Articles confer rights of pre-emption, however, such rights do not apply to allotments and issues of equity securities: (i) prior to the Company's first Acquisition or in connection with the fundraising and completion of such Acquisition; and (ii) that are, or are to be, wholly or partly paid otherwise than in cash. To the extent that such issues take place on a non-pre-emptive or partially non-pre-emptive basis, the Company's shareholders will suffer dilution in their percentage ownership and/or the price of the Ordinary Shares may be adversely affected. The search for acquisition targets and due diligence is fully funded for at least the next 12 months from the date of this Prospectus.

18. The ability of overseas shareholders to bring actions or enforce judgments against the Company or the Directors may be limited.

Guernsey law will govern the rights, obligations and relationships of the Shareholders and the Royal Court in Guernsey shall have jurisdiction to settle any actions arising in connection with the Company. Under the Judgments (Reciprocal Enforcement) (Guernsey) Law, 1957 (as amended) (the "**Judgments Law**") a judgment of a superior court can be reciprocally enforced in Guernsey by way of registration subject to certain qualifications to registration outlined in the Judgments Law. The scope of the Judgments Law is limited to a small number of jurisdictions including the UK, Israel, Netherlands and Italy. The Royal Court in Guernsey may (in its discretion) recognise as a valid judgment any final and conclusive judgment obtained in a court of a country other than those listed under the Judgments Law provided certain conditions are met. Legal advice needs to be taken before attempting to enforce a foreign judgment in the Guernsey courts.

19. In order to facilitate Acquisitions and other transactions, the Articles do not grant pre-emption rights to Shareholders

Although the Company intends to use the Net Proceeds for purposes of Acquisitions, further equity capital raisings will likely be required in order to complete Acquisitions, or the Company may issue Shares to the shareholders of an Acquisition target as a form of consideration. In addition, the Company may issue new Shares to incentivise employees or consultants. The Articles confer rights of pre-emption however such rights do not apply to allotments and issues of equity securities: (i) prior to the Company's first Acquisition

or in connection with the fundraising and completion of such Acquisition; and (ii) that are, or are to be, wholly or partly paid otherwise than in cash. A non-pre-emptive issuance of Shares would dilute existing holders of Shares in respect of both voting power and economic rights. In addition, if an Acquisition target has a large shareholder, the Company's issue of Shares as consideration for the acquisition of that Acquisition target may result in such shareholder subsequently holding a large stake in the Company, which may, in turn, enable it to exert significant influence in the Company.

20. There is a Controlling Shareholder of the Company who upon Admission will hold 48.36 per cent of the voting rights of the Company

When a person or members of a concert party hold or holds more than 50 per cent. of the voting rights in a company, no obligations under Rule 9 of the Takeover Code normally arise from acquisitions of further interests in shares by that person or concert party. Andrew Roberto Mankiewicz OBE, a Controlling Shareholder of the Company, will immediately following Admission hold 48.36 per cent. of the voting rights of the Company via Tanglin Capital Limited. While this is below the 50 per cent. threshold, he may accordingly increase his aggregate interests in Ordinary Shares without incurring any obligation under Rule 9 of the Takeover Code to make an offer for all the Ordinary Shares in the Company. In the event that he increases his holding of Ordinary Shares, therefore, the other Shareholders will have no legal right to have an offer made for their Ordinary Shares, and are not afforded the protections of the Takeover Code in relation to the making of a Rule 9 offer.

To mitigate this risk, Mr Mankiewicz has voluntarily entered into a Relationship Agreement with the Company to govern his conduct when transacting and acting in relation to the Company.

21. The CEO of the Company is not an employee of the Company

The CEO of the Company is not an employee and has been appointed via a consultancy agreement between the Company and SAP, under which he is the appointed individual who will be procured to provide CEO services to the Company. Whilst the Company has taken all reasonable steps to establish and maintain adequate procedures, systems and controls to enable it to comply with its obligations (including securing a personal indemnity from the individual in respect of the obligations of SAP), the Company is reliant upon the performance of third-party service providers for its executive function. In particular, the Company is reliant upon SAP to provide consultancy services to the Company and AWG to provide advisory services to the Company. Failure by any service provider to carry out its obligations in accordance with the terms of its appointment could have a materially detrimental impact on the activities of the Company.

22. Future substantial sales of Ordinary Shares, or the perception that such sales might occur, could depress the market price of the Ordinary Shares

Following the expiry of the Lock-In Agreement (described in paragraph 7 of Part 11 (*Details of the Placement*) of this Prospectus), one or more of the Directors could sell a substantial number of Ordinary Shares in the public market. Such sales, or the perception that such sales could occur, may materially adversely affect the market price of the Ordinary Shares. This may make it more difficult for Shareholders to sell their Ordinary Shares at a time and price that they deem appropriate, and could also impede the Company's ability to issue equity securities in the future. During the periods immediately prior to and following the end of the periods of sales restriction provided for by these lock-in arrangements, the market price of the Ordinary Shares may fall in anticipation of a sale of Ordinary Shares. Following the expiry of these arrangements, there will be no contractual restriction on the sale of the Ordinary Shares owned by the Shareholders who were previously subject to them. The Company cannot predict whether a substantial number of Ordinary Shares in addition to those which will be available in the Placement will be sold in the open market following the expiration or waiver of these restrictions. In particular, there can be no assurance that after the restrictions expire, such Shareholders will not reduce their holdings of the Ordinary Shares.

23. Investors will experience a dilution of their percentage ownership of the Company if the Warrants are exercised

The Company has issued a number of Warrants and upon exercise of such warrants Shareholders will be subject to dilution of their existing percentage ownership in the Company. As at the date of this Prospectus, a total of 206,800 Warrants are outstanding. The terms and conditions of the Warrants are summarised in paragraph 11.9 of Part 13 (*Additional Information*) of this Prospectus.

24. The Company's ability to pay dividends in the future depends, among other things, on the Company's financial performance and is therefore not guaranteed

The Board recognises dividends to be an important component of total shareholder return. The Company's present aim is to retain any earnings for future use within its business operations. The Board does not have plans to declare any dividends prior to any Acquisition. Upon the occurrence of an Acquisition, the Board will keep under review the desirability of paying dividends when it becomes commercially prudent to do so.

The Company can therefore give no assurance that it will be able to pay dividends going forward or as to the amount of such dividends, if paid. Any such dividends must be in compliance with the Companies Law, which requires the Company to pass a solvency test after payment of the dividend.

25. The Company's expected market capital is substantially in excess of the value of the assets on the balance sheet of the Company

The Company's expected market capital upon Admission is £10,340,000 while the value of the current assets on the balance sheet of the Company as set out in Part 9 (*Financial Information of the Company*) is £124,533. The Company estimates gross proceeds of the Placement amounting to £2,090,000 on Admission. The Company's expected market capital is substantially in excess of the value of the current assets on the balance sheet of the Company. Accordingly, Investors should not expect that they will necessarily be able to realise their investment in Ordinary Shares and may not be able to get back the amount which they have invested in the Company.

26. Exchange rate fluctuations may impact on the value of and the investment in the Ordinary Shares or any dividends in foreign currency terms

The Ordinary Shares will be quoted and any dividends to be paid in respect of them will be paid in UK pounds sterling. An investment in Ordinary Shares by an investor in a jurisdiction whose principal currency is not UK pounds sterling exposes the investor to foreign currency exchange rate risk. Any depreciation of the UK pounds sterling in relation to such foreign currency will reduce the value of the investment of the Ordinary Shares or any dividends in foreign currency terms.

RISKS RELATING TO THE LISTING

27. The FCA may decide to suspend the listing of the Ordinary Shares if the Company proposes to make an Acquisition and the FCA determines that there is insufficient information in the market about that Acquisition

Listing Rule 5.6.8 provides that generally when a Reverse Takeover is announced or leaked, there will be insufficient information in the market about the proposed transaction and the listed company will be unable to assess accurately its financial position and inform the market appropriately, so suspension of trading in the listed company's securities will often be appropriate. The London Stock Exchange will suspend the trading in the listed company's securities if the listing of such securities has been suspended by the FCA, however, if the FCA is satisfied that there is sufficient publicly available information about the proposed transaction it may agree with the listed company that a suspension is not required. The FCA will have regard to: (i) whether the target company is listed or trading elsewhere; (ii) the quality of the information that is available; and (iii) whether the issuer is able to fill any information gap at the time of announcing the terms of the transaction (generally by publishing a prospectus in relation to the enlarged group at the same time) in determining whether suspension is appropriate.

Due to the target raise of the Company at its initial Admission, the Company is not eligible to take advantage of the revised Listing Rules applicable to special purpose acquisition companies. On 21 August 2021, a new regime was introduced into the Listing Rules to allow certain special shell companies to avail themselves of a process whereby their securities would not be suspended when a Reverse Takeover is announced or where details of a proposed Acquisition are disclosed prior to an announcement, as outlined above. In order for a company to fall within the terms of this regime, certain criteria must be fulfilled. The Company has not met and does not intend to meet this criteria, therefore it is ineligible for the exemptions offered by this regime.

The FCA retains a general power to suspend a company's securities where it considers it necessary to protect investors. It may decide to exercise such power where the Company undertakes a transaction which, because of its size compared with the Company, would be a Reverse Takeover. Applying the FCA's considerations, the Company would only expect this to be the case if the transaction it was contemplating related to a target company which was not listed or trading elsewhere and the transaction became public prior to the time in which the Company was able to fill the information gap regarding its financial position.

If information regarding a significant proposed transaction were to leak to the market, or the Board considered that there were good reasons for announcing the transaction at a time when it is unable to provide the market with sufficient information regarding the impact of an Acquisition on its financial position, the FCA could suspend the Company's listing. Any such suspension would be likely to continue until sufficient financial information on the transaction is made public. Depending on the nature of the transaction (or proposed transaction) and the stage at which it is leaked or announced, it may take a substantial period of time to compile the relevant information, particularly where the target does not have financial or other information readily available which is comparable with the information a listed company would be expected to provide, and the period during which the Ordinary Shares would be suspended may therefore be significant. Furthermore, the Listing Rules provide that the FCA will generally cancel the listing of a listed company's securities when it completes a Reverse Takeover. If the FCA decided to cancel the Company's listing in such circumstances, the Company would expect to publish a prospectus and seek the simultaneous re-admission to listing at the time of completion of any such Acquisition but there is no guarantee that such re-admission would be applied for or granted, or that the Board may not consider it to be in the best interests of Shareholders for the Company to remain unlisted or to apply for admission to an alternative stock exchange, whether in the United Kingdom or another jurisdiction. A suspension or cancellation of the Company's Ordinary Shares would materially reduce liquidity in such shares which may affect an investor's ability to realise some or all of its investment and/or the price at which such Investor can effect such realisation.

The process, cost and timing of re-admission may delay or jeopardise any potential future Acquisitions.

28. There has been no public trading market for the Ordinary Shares, and an active trading market may not develop or be sustained

Prior to Admission, there will have been no public trading market for the Ordinary Shares and Admission should not be taken as implying that there will be a liquid market for the Ordinary Shares. An active trading market for the Ordinary Shares might not develop or, if developed, might not be sustained. If an active and liquid trading market is not developed or sustained, the liquidity and trading price of the Ordinary Shares could be materially adversely affected and investors may have difficulty selling their Ordinary Shares. Even if an active trading market develops, the market price for the Ordinary Shares may fall below the Price, perhaps substantially and for a substantial period. As a result of fluctuations in the market price of the Ordinary Shares, investors may not be able to sell their Ordinary Shares at or above the Price, or at all.

29. The price of the Ordinary Shares may fluctuate in response to a number of factors, many of which may be out of the Company's control, and investors could lose all or part of their investment

Publicly traded securities from time to time experience significant price and trading volume fluctuations that may be unrelated to the operating performance of the company that issued them. The market price of the Ordinary Shares may prove to be volatile, which may prevent Shareholders from being able to sell their Ordinary Shares at or above the price they paid for them. The market price for the Ordinary Shares could fluctuate for various reasons, many of which are outside the Company's control. These factors could include: variations in operating results in the Company's reporting periods; cyclical fluctuations in the performance of the Company's business; changes in financial estimates by securities analysts; changes in market valuations of similar companies; announcements by the Company or its competitors of significant contracts, acquisitions, joint ventures or capital commitments; speculation, whether or not well-founded, regarding the intentions of the Company's major Shareholders or significant sales of shares by any such Shareholders or short selling of the Ordinary Shares; speculation, whether or not well-founded, regarding possible changes in the Company's management team; additions or departures of key employees; any shortfall in revenue or net profit or any increase in losses from levels expected by securities analysts; and future issues or sales of Ordinary Shares. Any or all of these events could result in a material decline in the price of the Ordinary Shares. Investors may not be able to sell their Ordinary Shares at or above the Price, or at all.

30. The proposed standard listing of the Ordinary Shares will afford investors a lower level of regulatory protection than a premium listing

Application will be made for the Ordinary Shares to be admitted to a standard listing on the Official List. A standard listing will afford Investors in the Company a lower level of regulatory protection than that afforded to investors in companies with premium listings on the Official List, which are subject to additional obligations under the Listing Rules.

In particular, unless such approval is required by law or other regulatory process, Shareholders will not have the opportunity to vote on any Acquisition even if significant numbers of Ordinary Shares are being issued as consideration for that Acquisition.

RISKS RELATING TO THE LEGAL AND REGULATORY ENVIRONMENT

31. Legal risks and risks associated with changes in regulations

The Company's focus on ESG, which is a relatively new area of regulatory focus, means that the direction and impact of changes in regulations can be unpredictable, there is a risk that regulatory developments will not bring about positive changes and opportunities, or that the costs associated with those changes and opportunities will be significant. In particular, there is a risk that regulatory change will bring about significant downturn in the prospects of one or more acquired businesses, rather than presenting a positive opportunity.

32. Legal risks associated with changes to Listing Rules

The FCA released the results of their consultation, CP 21/21, to reform the current Listing Rules on the 2 December 2021 in their policy statement PS 21/22. This included increasing the minimum market capitalisation threshold for the standard listing segment to £30 million. The Company does not envisage being able to achieve a minimum market capitalisation of £30 million on Admission nor given the Company has not yet identified a target company for Acquisition it cannot at the date of this Prospectus confirm whether the higher minimum market capitalisation threshold would be met on any Reverse Takeover. The Company, however, will be able to take advantage of the transitional provision included by the FCA, which allows a Company who made a complete submission to the FCA for admission prior to 3 December 2021 to continue with Admission on the lower minimum market capitalisation of £700,000 as long as it does so within 18 months as is the intention of the Company. Given the Company was not listed prior to 3rd December 2021, it will not be able to take advantage of the other transitional provision allowing a listed special purpose acquisition company to apply for re-admission post an acquisition on the lower minimum market capitalisation of £700,000 provided such application is made prior to 3 December 2023. If the Company fails to meet the new minimum market capitalisation of £30 million on re-admission following a Reverse Takeover, it will be unable to be re-admitted to the Official List and will have to seek admission to a different market.

33. The Company may be unable to transfer to a Premium Listing or other appropriate listing venue following the Acquisition

The Company is not currently eligible for a Premium Listing under Chapter 6 of the Listing Rules. Upon completion of an Acquisition, the Directors may seek to transfer from a Standard Listing to either a Premium Listing or other appropriate listing, based on the track record of the company or business it acquires, subject to fulfilling the relevant eligibility criteria at the time. There can be no guarantee that the Company will meet such eligibility criteria or that a transfer to a Premium Listing or other appropriate listing will be achieved. For example, such eligibility criteria may not be met, if the Company acquires less than a controlling interest in the target. In addition, there may be a delay, which could be significant, between the completion of the Acquisition and the date upon which the Company is able to seek or achieve a Premium Listing or a listing on another stock exchange.

If the Company does not achieve a Premium Listing or the Directors decide to maintain the Standard Listing, the Company will not be obliged to comply with the higher standards of corporate governance or other requirements which it would be subject to upon achieving a Premium Listing and, for as long as the Company continues to have a Standard Listing, it will be required to continue to comply with the lesser standards applicable to a company with a Standard Listing. This would mean that the Company could be operating a substantial business but would not need to comply with such higher standards as a Premium Listing provides.

Alternatively, in addition to, or in lieu of seeking a Premium Listing, the Company may determine to seek a listing on another stock exchange, which may not have standards or corporate governance comparable to those required by a Premium Listing or which Shareholders may otherwise consider to be less attractive or convenient.

Further details regarding the differences in the protections provided by a Premium Listing as against a Standard Listing are set out in Part 10 (*Consequences of a Standard Listing*) of this Prospectus.

34. Risks associated with taxation regulations

Statements in this document relating to taxation are based on Guernsey and UK tax law and practice as at the date of this document. Any change in tax status of the Company or any of its underlying investments, or to tax legislation or practice could affect the value of investments held by the Company, affect the Company's ability to provide returns to shareholders and affect the tax treatment for shareholders of their investments in the Company. In particular, the current spending by global governments to ameliorate some of the impact of the lockdowns imposed because of the COVID-19 pandemic may lead to increased taxation. There can be no certainty that the current taxation regime in Guernsey and the UK, or in any jurisdiction in which the Company may operate or invest in the future, will remain in force, or that the current levels of corporate taxation will remain unchanged. Prospective investors should consult their tax advisors with respect to their own tax position before deciding whether to invest in the Company.

To the extent that the Company makes investments in businesses or companies which are established in jurisdictions outside the UK, there is a risk that the Company may be subject to tax (including withholding tax) under the tax rules of the jurisdictions in which its investee businesses or companies are established. Although the Company will endeavour to minimise any such taxes this may affect the level of returns to Shareholders.

2. HISTORICAL FINANCIAL INFORMATION

The Company's financial information as of and for the period commencing from the date of incorporation to 30 June 2022 (collectively the "**Historical Financial Information**") has been included Section B of Part 9 (*Financial Information of the Company*) of this Prospectus.

The Historical Financial Information has been prepared in accordance with the basis of preparation and accounting policies as set out in Notes 2 and 3 of Section B of Part 9 (*Financial Information of the Company*) of this Prospectus which are consistent with those that will be used by the Company in its unaudited financial statements as at and for the period commencing from the date of incorporation and ending 30 June 2022. The Company's Historical Financial Information has been prepared in accordance with the requirements of the UK Prospectus Regulation.

Unless otherwise stated, all financial information relating to the Company in this document has been prepared in accordance with the basis of preparation and accounting policies as set out in Notes 2 and 3 of Section B of Part 9 (*Financial Information of the Company*) of this Prospectus and should be read in conjunction with Accountant's report thereon set out in Section A of Part 9 (*Financial Information of the Company*) of this Prospectus.

The Company's first financial year commenced on the date of incorporation and ended on 30 June 2022. Subsequent financial years of the Company will run from 1 July to 30 June.

Under section 256(1) of the Companies Law, the members of a Guernsey company may pass a waiver resolution exempting the company from the requirement under section 255 to have its accounts for a financial year audited. A company which is defined as a "large company" is prohibited from passing an audit waiver resolution under section 256(1). Subject to limited exceptions, a "large company" is a company which meets two of the following qualifying criteria: (a) the company has an annual net turnover of £10.2 million or greater; (b) the company has a net balance sheet of £5.1 million or greater; and/or (c) the company has an average number of employees of 50 or more.

Pursuant to section 256(1) of the Companies Law, by a written, waiver resolution passed on 27 June 2022 the Company resolved to waive the requirement to have its accounts audited for the purposes of section 255 of the Companies Law for the first financial year and subsequent financial years. Therefore, until such time as the Company becomes a large company or the waiver resolution is rescinded by members in accordance with the Companies Law, the Company is not required to prepare audited accounts for the purposes of section 255 of the Companies Law.

Notwithstanding the foregoing, the Company will prepare audited accounts for the first financial year and subsequent financial years pursuant to the ongoing requirements of a listed company if it is admitted to the main market of the London Stock Exchange. Such audited accounts will be prepared in accordance with the IFRS UK. All references to the preparation of "audited" financial information or accounts for and on behalf of the Company or the Company's financial information being "audited" should be construed accordingly.

The Historical Financial Information in Section B of Part 9 (*Financial Information of the Company*) of this Prospectus is covered by the accountants' report preceding it, which was prepared in accordance with the Standards for Investment Reporting issued by the Auditing Practices Board in the United Kingdom.

3. CURRENCY PRESENTATION

As a result of the rounding, the totals of data presented in this document may vary slightly from the actual arithmetic totals of such data. In certain statistical and operating tables contained in this Prospectus, the sum of numbers in a column or a row may not conform to the total figure given for that column or row. Percentages in tables have been rounded and accordingly may not add up to 100 per cent.

5. MARKET, ECONOMIC AND INDUSTRY DATA

This document contains historical market, economic and industry data and forecasts which have been obtained from industry publications, market research and other publicly available information. Certain information regarding market size, market share, market position, growth rates and other industry data pertaining to the Company and its business contained in this document consist of estimates based on data compiled by professional organisations and on data from other external sources. The Company confirms that all such third-party information contained in this document has been accurately reproduced and, so far as the Company is aware and able to ascertain from information published by such third party, no facts have been omitted that would render the reproduced information inaccurate or misleading. Whilst the Directors believe the third-party information included therein to be reliable, the Company has not independently verified such third-party information.

In some cases, there is no readily available external information (whether from trade and business organisations and associations, government bodies or other organisations) to validate market related analyses and estimates, requiring the Company to rely on internally developed estimates.

Where third-party information has been used in this document, the source of such information has been identified. Where the Company has relied upon internally developed estimates, the information is identified as Company estimates or beliefs.

The Company does not intend, and does not assume any obligation, to update industry or market data set forth in this document. Because market behaviour, preferences and trends are subject to change, prospective investors should be aware that market and industry information in this document and estimates based on any data therein may not be reliable indicators of future market performance or the Company's future results of operations.

6. REFERENCES TO DEFINED TERMS

Certain terms used in this document, including certain capitalised terms and certain technical and other terms, are defined, and certain selected industry and technical terms used in this document are defined and explained in Part 14 (*Definitions*) of this Prospectus.

7. INFORMATION NOT CONTAINED IN THIS DOCUMENT

No person has been authorised to give any information or make any representations other than those contained in this document and, if given or made, such information or representations must not be relied upon as having been so authorised. Neither the delivery of this document nor any sale made hereunder shall, under any circumstances, create any implication that there has been no change in the affairs of the Company since the date of this document or that the information in this document is correct as of any time subsequent to the date hereof.

8. INFORMATION REGARDING FORWARD-LOOKING STATEMENTS

This document includes forward-looking statements. These forward-looking statements involve known and unknown risks and uncertainties, many of which are beyond the Company's control and all of which are based on the Board's current beliefs and expectations about future events. Forward-looking statements are sometimes identified by the use of forward-looking terminology such as "believe", "expects", "targets", "may", "will", "could", "should", "shall", "risk", "intends", "estimates", "aims", "plans", "predicts", "continues", "assumes", "positioned" or "anticipates" or the negative thereof, other variations thereon or comparable terminology. These forward-looking statements include all matters that are not historical facts. They appear in a number of places throughout this document and include statements regarding the intentions, beliefs or current expectations of the Directors or the Company concerning, among other things, the results of operations, financial condition, prospects, growth, strategies and dividend policy of the Company and the industry in which it operates. In particular, the statements under the sections headed "*Summary*

Information”, “*Risk Factors*”, “*Business Description*” and “*Operating and Financial Review*” of this Prospectus as well as other expressions of the Company’s targets and expectations and other future events or prospects are forward-looking statements.

These forward-looking statements and other statements contained in this document regarding matters that are not historical facts involve predictions. No assurance can be given that such future results will be achieved; actual events or results may differ materially as a result of risks and uncertainties facing the Company. Such risks and uncertainties could cause actual results to vary materially from the future results indicated, expressed or implied in such forward-looking statements. Important factors that could cause the Company’s actual results to so vary include, but are not limited to:

- the Company’s ability to find an Acquisition within a reasonable timeframe;
- a suitable Acquisition is identified but the Company at that point does not have the necessary funds to complete the Reverse Takeover and cannot raise further funds to do so;
- a suitable Acquisition is identified but whilst the Company has sufficient funds (or access to such funds) to complete the Reverse Takeover, it is not able to re-list on the standard listing segment of the Official List nor on any other suitable exchange;
- the Company’s ability to ascertain the merits and risks of the Acquisition;
- the availability and cost of equity or debt capital, if required, for future transactions;
- changes in the economic environment; and
- legislative and/or regulatory changes for ESG reporting, particularly for private companies, which may affect the Company’s Acquisition targets.

For more information regarding these and other uncertainties, please see Part 2 (*Risk Factors*) of this Prospectus.

Subject to the requirements of the Prospectus Regulation Rules, the Disclosure Guidance and Transparency Rules and the Listing Rules, or applicable law, the Company explicitly disclaims any obligation or undertaking publicly to release the result of any revisions to any forward-looking statements in this document that may occur due to any change in the Company’s expectations or to reflect events or circumstances after the date of it.

Investors should note that the contents of these paragraphs relating to forward-looking statements are not intended to qualify the statements made as to the sufficiency of working capital in this document.

Prospective investors must rely upon their own representatives, including their own legal or financial advisors and accountants, as to legal, taxation, investment or any other related matters concerning the Company and an investment therein. Statements made in this document are based on the law and practice currently in force in England and Wales and are subject to changes therein.

PART 7

BUSINESS OVERVIEW

The Company was incorporated on 28 May 2021 as a non-cellular company limited by shares with the name Ikigai Ventures Limited. The registered number of the Company is 69265. The Company's Legal Entity Identifier is 213800L6HSNUEFY3J85. The Company was set up to undertake the Acquisition of one or more companies or businesses that have a strong positive social impact and/or ESG strategy as part of their core business in Asia. The Company has no operating or management history, no revenues and has never traded and, save as set out in this Prospectus, has not entered into any significant transactions or financial commitments.

The Company does not have any specific acquisition under consideration at present and does not expect to engage in substantive negotiations with any target company or business until after Admission. The Acquisition will be treated as a Reverse Takeover, and require that an application for the Company's shares to be re-admitted to the Official List and trading on the Main Market of the London Stock Exchange or, if applicable, an alternative suitable stock exchange be submitted.

Although the Company's strategy in identifying a prospective target company or acquisition in the social impact and/or ESG related sectors will not be limited to a specific geographical region or stage of development, it is highly likely that the initial target business will be domiciled somewhere in Asia-Pacific due to the extensive network and business relationships that the Directors have in this region.

According to, "Your Guide to ESG Reporting" by The London Stock Exchange Group, signatories to the United Nations supported Principles for Responsible Investment (PRI) represented US\$60 trillion in assets under management in 2020, up from US\$22 trillion in 2010. This represents the world's largest voluntary corporate sustainability initiative with over 7,000 corporate signatories in 135 countries, according to PriceWaterhouseCoopers' report, "Environmental, social and governance (ESG) in Asia". The Directors believe that this significant shift in importance and magnitude of investment made globally by institutional investors into assets with ESG credentials will increase the number of opportunities for the Company to identify and fund a prospective acquisition.

On Admission, the Company will be authorised to issue one class of Ordinary Shares. It is intended that the Ordinary Shares will be admitted by the FCA to a Standard Listing on the Official List in accordance with Chapter 14 of the Listing Rules and to trading on the Main Market of the London Stock Exchange.

Ikigai at its Core

Ikigai, (pronounced "ee-key-guy") is a Japanese concept that means, amongst other things, a reason for being and refers to having a direction or purpose in life. For some people, it could simply be what motivates oneself in the morning and keeps you going. Whereas for others, Ikigai focuses on individual actions that gives one a sense of meaning to life as well as to the community at large. Although the origin of the word can be traced back to the Japanese Heian period of 794-1185, the Directors believe this age-old ideology has a growing significance in the 21st century corporate world with reference to businesses increasingly emphasising a positive social impact as well as ESG (economic, social, governance) strategies as their primary focus. The Directors believe that ikigai is not simply a fashionable statement about sustainability or corporate social responsibility, but that companies ought to have in essence at its core elements of sustainability and ESG.

In the past, ESG factors in companies carried interest in only a niche group of institutional investors, according to, "Your Guide to ESG Reporting" by The London Stock Exchange Group. However today, ESG related businesses have recently moved from a "peripheral" to a "core" part of investment analysis across all asset classes, according to the same report.

The shift to incorporate sustainability into the core business models of business, has most notably been seen by BlackRock, one of the world's largest asset managers, with approximately US\$7 trillion assets under management globally, who announced several unprecedented initiatives to place sustainability at the centre of its investment approach - "a significant shift that could have wide reverberations for companies globally". The reasons for these "unprecedented initiatives", according to Blackrock, include:

- future financial decision-makers are asking more from companies and are seeking more sustainable investment solutions;
- regulators and governments are expanding their focus on incorporating sustainability into investment information and decision making; and
- there is growing recognition that ESG research and analysis can potentially identify investment risks and generate excess returns.

According to the website, worldfinance.com, PriceWaterhouseCoopers has been reported to predict that US\$7.5 trillion will be invested into sustainable products by 2025 with US\$1 trillion of those as ESG funds in Europe. The Directors believe that this age-old ideology of ikigai can be viewed as an influence on a growing proportion of mainstream investment decision makers in the 21st century and thereby creating opportunities for Acquisitions.

Business Strategy

The Company has been formed to undertake Acquisitions of target companies or businesses which have either sustainability, a strong positive social impact and/or ESG strategy as part of its core business. The Company does not have any specific acquisitions under consideration and does not expect to engage in substantive negotiations with any target company or business until after Admission. Consideration for an Acquisition is likely to be funded through a combination of the issuance of new Ordinary shares or convertible debt securities to the shareholders of the Acquisition as well as through capital raised on Admission.

The Directors expect that the target business will have a sustainable business model which will allow it to expand globally. While there is no restriction as to the geographical location of the target business, the Directors expect that the first Acquisition(s) will most likely take place in Asia-Pacific or into a target business outside of Asia-Pacific with the potential to expand quickly into the Asia-Pacific region, due to the extensive experience and network of the Company's Chief Executive Officer, advisors, and key management personnel. The Acquisition may comprise of the Acquisition of a single company or business or a series of acquisitions by way of a "roll-up" strategy whereby the Company acquires and merges several businesses in a particular sector. The benefits of this strategy include the reduction of total overhead costs, leveraging a diverse client base, speed to enter new markets and possibly having a wider geographical reach.

Any Acquisition will be driven by and subject to Board approval. It is envisaged that the determination of the Company's post-acquisition strategy and whether any of the Directors will remain with the combined company and on what terms, will be settled at or prior to the completion of the Acquisition. The Directors will be exclusively responsible for making a decision on any potential Acquisition.

Acquisition Criteria

It is envisaged that the Company will seek to acquire target businesses which have one or more of the following key characteristics:

- a strong positive social impact and/or ESG strategy behind them;
- an experienced management team that has a proven track record;
- growth potential beyond its home market, ideally with the potential to expand globally;
- a solid reputation with their customers and/or clients; and
- shareholders who are willing to accept Ordinary Shares or other securities in the Company as a significant part of the consideration for their businesses.

The Directors will consider investing into start-ups if some of the above criteria are met, particularly if the management team is experienced and has a strong network.

The criteria set out above are those which the Directors believe to be important in evaluating a prospective target business. The list is not intended to be exhaustive. Any evaluation relating to the merits of a particular

Acquisition will be based on, to the extent relevant, the above factors as well as other considerations deemed relevant to the Company's business objectives and strategy. The Company's focus will initially be on obtaining a controlling interest in one or more target business(es).

Target Sectors

Although the Company is sector agnostic in its target business acquisition strategy, the Directors believe that companies that have developed new business models as part of the Fourth Industrial Revolution offer opportunities unimaginable in the past as they represent a fundamental change in the way we live and work, as well as the way we relate to one another – an important part of the *ikigai* philosophy. The First Industrial Revolution was powered by the steam engine, while electricity was one of the main sources of moving forward and advancing in the Second Industrial Revolution. The Third Industrial Revolution is also known as the digital revolution and focused on the shift from mechanical and analogue electronic technology to digital electronics. The Fourth Industrial Revolution is the ongoing automation of traditional manufacturing and industrial practices using modern smart technology, and focuses on the increased automation, improved communication and self-monitoring and production of smart machines that can analyze and diagnose issues without the need for human intervention. As the World Economic Forum described it, the Fourth Industrial Revolution offers us the real opportunity, "...to look beyond technology, and find ways to give the greatest number of people the ability to positively impact their families, organisations and communities."

The target Acquisition business may have a unique technology and/or intellectual property that it has developed, have a strong brand equity and market position in its home market and/or have a unique business model which will allow it to expand rapidly on a global scale. But moreover, the Directors believe that the target Acquisition business needs to harness converging technologies in order to create an inclusive, human-centred business model for the future - the *ikigai* of the 21st century.

Post-Acquisition Strategy

Following the completion of an Acquisition, the Company intends to participate in the management of the acquired business and adopt an operational strategy with the aim of generating value for its Shareholders. The Board believes that an acquired business will benefit from the Company's experience and advice, with the intention that all Shareholders will obtain higher returns from the expansion of the Company's business after a series of Acquisitions. It is likely that any Acquisition will constitute a Reverse Takeover under the Listing Rules and the Company's Listing on the Official List will be cancelled. However, it is expected that, subject to it being eligible, the Company will seek re-admission to the Official List and the Main Market or another suitable stock exchange upon completion of the Acquisition.

Cash resources and use of Proceeds

The Gross Proceeds are £2,090,000 which, after settling the cost of Placement and Admission of £713,665, will result in Net Proceeds of £1,376,335. It is estimated that, prior to Admission, some £297,574 of the total costs of Placement and Admission will have been settled. which, together with cash on hand as at 26 August 2022, will give the Company cash resources of £1,737,214.

The aggregate fees and expenses expected to be incurred by the Company in connection with the Placement (exclusive of any applicable VAT) are:

<u>Category</u>	<u>Expense</u>
Financial adviser fees:	£75,000
Legal advice:	£365,000
Broking commissions:	£174,500
Audit and accounting:	£35,550
Stock Exchange and FCA fees:	£38,700
Other costs and expenses:	£24,915
Total:	£713,665

Should the Company's cash resources of £1,737,214 be used to fund a 12-month period of ongoing operating costs post-Admission, the Company would have £1,312,433 available to fund due diligence exercises on Acquisition opportunities. However, should the Company's cash resources of £1,737,214 be used to fund an 18-month period of ongoing operating costs post-Admission, the Company would have £1,086,525 available to fund due diligence on Acquisition opportunities.

The ongoing operating costs of the Company are budgeted at £424,781 per annum. Such costs comprise audit fees, director salaries, advisor fees, fees payable to the London Stock Exchange, insurance costs and other general and administrative costs.

It is intended that the operating costs of running the business of the Company prior to its first Acquisition will be kept to the minimum required to commensurate with full compliance of the Listing Rules and other regulatory requirements and at all times with good corporate governance.

The Company's cash resources of £1,737,214 will be used as follows:

- to pay annual ongoing costs and expenses of the Company of £424,781 (inclusive of VAT);
- to pay for the costs of due diligence associated with any approved potential Acquisition; and
- to pay towards the costs of re-admission on an Acquisition.

The estimated breakdown of the annual ongoing costs and expenses are as follows:

- Directors' fees and consultant costs £196,667
- Professional fees: £113,854
- Marketing and travel: £67,110
- General administration: £47,150

In the course of negotiations with a potential target, the Company may agree to fund all or part of the cash costs associated with the preparation of materials for and legal and other costs associated with a Reverse Takeover.

In certain circumstances, where the Board considers it to be advantageous to its shareholders, the Company may agree to advance some of its initial capital to a potential target prior to the completion of an Acquisition. Such an advance may itself be considered to be a Reverse Takeover and the costs and consequences of making any such advance will be weighed by the Board in arriving at their determination.

To the extent that the initial capital remains unused at the time of Acquisition, the Company intends to use such surplus capital to contribute to any cash consideration paid to the sellers of a target business and/or for general working capital of the enlarged business. Consideration for an Acquisition is likely to be funded through the issue of new Ordinary Shares or convertible securities, or a combination of the above, to acquire the target business.

Due diligence costs in connection with Acquisition opportunities

Post-Admission, the Company's immediate objective is to source and assess a number of Acquisition targets. As stated above, the Company intends to undertake initial due diligence on Acquisition opportunities using its internal resources as far as possible, with third party professionals only being engaged after initial in-house due diligence proves positive. The Company's principal in-house resources are the Directors.

As stated above, the amount of the Net Proceeds able to be allocated against due diligence activities on Acquisition opportunities will be dependent on how quickly a suitable Acquisition is identified. On the basis that the Company has a known operating cost base of £424,781 per annum, the funds available to undertake due diligence on Acquisition opportunities will be £1,312,433 over a 12-month period and £1,086,525 over an 18-month period.

Prior to completing an Acquisition, the Net Proceeds, which will fall over time, being reduced by ongoing operating costs will be held in an interest-bearing deposit account or invested in short-term money market fund instruments (as approved by the Directors) and will be used for general corporate purposes, including the Company's ongoing costs and expenses, including legal, financial, technical and operational due diligence costs and other costs of sourcing, reviewing and pursuing an Acquisition. The costs and expenses of investigating any particular Acquisition opportunity will largely be determined by the nature of the relevant target.

The Company's intention is to use the Net Proceeds to enable it to evaluate potential Acquisition targets and to pay professional fees (i.e. due diligence, legal fees, advisors fees, accountants fees) in relation to an Acquisition, which may include further complementary Acquisitions. As it is anticipated that the consideration for an initial Acquisition will be funded by the issue of further Ordinary Shares, the Board considers that the Gross Proceeds are sufficient to cover both the cost of Placement and Admission, Acquisition search and due diligence processes and the Company's annual operating costs for a period of 18 months from the date of this Prospectus.

There is no specific expected target value for an initial Acquisition.

However, in the event that a future Acquisition presents itself which would require the raising of additional capital (i.e. as the consideration payable is greater than the amount of Net Proceeds remaining at the relevant time), the Directors will consider raising additional equity, debt and/or other financial instruments to finance such an Acquisition.

For the avoidance of doubt, the Board considers that the Gross Proceeds will be sufficient to cover both the cost of Placement and Admission, the Acquisition search and evaluation costs and the Company's ongoing operating costs up to the point of completion of an initial Acquisition, or for a period of 18 months from the date of this Prospectus, whichever is sooner.

Should a suitable Acquisition not be identified and acquired within 18 months from the date of this Prospectus, additional funding will need to be sourced by the Company to fund ongoing operating costs beyond this date.

In the event that funding is withdrawn prior to admission, and the fundraising target is not met the Company will not be able to cover its working capital demands and may withdraw its application for admission. Whether for this reason or simply if a target is not identified within 18 months of the Placement, it is the intention of the Directors that any remaining funds will be returned to investors.

Following an Acquisition, subject to its eligibility at that time, the Company intends to seek re-admission of the Group to listing on the Official List of the FCA and to trading on the Main Market of the London Stock Exchange or admission to trading on AIM or admission to another stock exchange and the objective of the Company will be to operate the acquired business and implement an operating strategy with a view to generating value for its Shareholders through operational improvements as well as potentially through further complementary Acquisitions. The Company may subsequently seek to raise further capital following an Acquisition to accelerate the development of the business if there are attractive commercial reasons to do so.

Information concerning the Issuer's Capital Resources

The Company has raised Gross Proceeds of £2,090,000 from the Placement before expenses of the Placement of £713,665 including VAT. The Net Proceeds of £1,376,335, together with cash on hand at 26 August 2022, will give the Company cash resources of £1,737,214.

The Directors believe that, in conjunction with an Acquisition, further equity capital raisings will likely be required by the Company to accelerate the development of the assets acquired in any Acquisition. The amount of any such additional equity to be raised will depend on the nature of the Acquisition opportunities which arise and the form of consideration used by the Company to make any Acquisition and cannot be determined at this time.

The Company expects that any returns for Shareholders would derive primarily from capital appreciation of the Ordinary Shares and any dividends paid to the Shareholders pursuant to the Company's dividend policy set out in the next paragraph.

Dividend Policy

The Board recognises dividends to be an important component of total shareholder return. The Company's present aim is to retain any earnings (if any) for future use within its business operations. The Board does not have plans to declare any dividends prior to any Acquisition. Upon the occurrence of an Acquisition, the Board will keep under review the desirability of paying dividends when it becomes commercially prudent to do so.

Trend Information

The current global pandemic may have a negative effect on travelling to meet prospective Acquisition targets. However, the Directors are of the view that conducting business virtually (via video calls) and the like are currently an acceptable alternative which will allow the Company to move forward with identifying and assessing potential targets and to also initiate initial discussions and possibly conduct initial due diligence by using third party advisors who are located near the potential Acquisition. The travel restrictions associated with the COVID-19 pandemic may limit the ability of the Directors to conduct site visits and conduct other in-person due diligence. The Directors have a strong network of contacts in Asia Pacific and will reach out to people which may be able to assist in advancing the growth of the Company.

Board and Employees

The Board, collectively, has significant experience in establishing and growing businesses along with significant experience of managing public companies and risks associated with such ventures both operationally and financially. The Company has appointed two non-executive directors and a chief executive officer. Other than the Board, the Company does not intend to retain any employees prior to completion of its first Acquisition. Please see Part 8 (*Directors and Corporate Governance*) of this Prospectus for the detailed experience of the Board.

The Articles and Guernsey law permit a director to be counted in the quorum present at any board meeting in relation to any resolution in respect of which he has declared an interest and the director may vote thereon. Whilst a director may vote on such a matter, he must comply with his director's duties to the Company under Guernsey law; i.e. a fiduciary duty to act in good faith (which includes a duty to exercise his own judgment, to avoid conflicts without the informed consent of the Company and to act for proper purposes) and a duty to exercise due care and skill.

The remuneration committee will have responsibility for determining, within agreed terms of reference, the Company's policy on the remuneration of any senior executives.

Nomination Committee

Given the size of the Company and its operations, the Board has not yet established a separate nomination committee. However, upon completion of a successful acquisition, the Board will move to establish a nomination committee. The nomination committee will be responsible for reviewing, within the agreed terms of reference, the structure, size and composition of the Board, undertaking succession planning, leading the process for new Board appointments and making recommendations to the Board on all new appointments and re-appointments of existing directors.

9. CORPORATE GOVERNANCE

As a company with a Standard Listing, the Company is not required to comply with the provisions of the UK Corporate Governance Code. The Directors have decided, so far as is practicable given the Company's size and nature, to voluntarily adopt and comply with the Quoted Companies Alliance's Corporate Governance Code (the "QCA Code"). However, at present, due to the size and nature of the Company, the Directors acknowledge that adherence to certain provisions of the QCA Code may be delayed until such time as the Directors are able to fully adopt them.

Specifically,

- a. The QCA Code recommends that companies publish key performance indicators which align with strategy and feedback through regular meetings with shareholders and directors. The Company will not comply with this provision until after such time as it has made an Acquisition.
- b. The QCA Code also recommends that the board has embedded an effective risk management practice which should include a description of what the board does to identify, assess and manage risk and how it gets assurance that the risk management and related control systems in place are effective. At present, due to the nature of the Company, a formal risk management policy would not be in place until after such time as it has made an Acquisition. A risk management approach would be taken however when determining an Acquisition target, considering costs and expenses, planning the Acquisition structure and appointment of senior management (if any).
- c. At present, due to the size and nature of the Company, the Directors would not evaluate board performance on a regular basis or make plans for succession planning. Once an Acquisition has been made, if appropriate, the Company will put in place the appropriate practices.
- d. Further, until the Acquisition is made, the Company will not have nomination, remuneration, audit or risk committees. The Board as a whole will instead review its size, structure and composition and the scale and structure of the Directors' fees (taking into account the interests of the Shareholders and the performance of the Company), take responsibility for the appointment of auditors and payment of their audit fee, monitor and review the integrity of the company's financial statements and take responsibility for any formal announcements of the Company's financial performance. Following the Acquisition, the Board intends to put in place nomination, remuneration, audit and risk committees.
- e. While the Chief Executive Officer will also fulfil the role of Chairman, two diverse and multi-disciplinary Non-Executive Directors have also been appointed to the board who would be able to provide a range of reviews and balance when making decisions. When an Acquisition is made, the Company will consider whether or not additional Directors, including a separate Chairman of the Board should be appointed.

The Company will be led by an effective and entrepreneurial Board, whose role is to promote the long term sustainable success of the Company, generating value for shareholders and contributing to wider society.

The Board will ensure that it has the policies, processes, information, time and resources it needs in order to function effectively and efficiently.

The Board will ensure that the necessary resources are in place for the Company to meet its objectives and measure performance against them.

Following the Acquisition, subject to eligibility, the Directors may seek to transfer the Company from a Standard Listing to either a Premium Listing and/or other appropriate stock exchange, based on the optimal listing for the company or business it acquires, subject to fulfilling the relevant eligibility criteria at the time. Following any such Premium Listing, the Company would be required to comply with the continuing obligations contained within the Listing Rules in the same manner as any other company with a Premium Listing. The Company would continue to be subject to the Disclosure Guidance and Transparency Rules and the Market Abuse Regulation.

10. MANDATORY BIDS AND COMPULSORY ACQUISITION RULES RELATING TO THE SHARES

10.1 Mandatory bid

The Takeover Code applies to the Company. Under Rule 9 of the Takeover Code, if:

- (a) a person acquires an interest in shares which, when taken together with shares already held by him or persons acting in concert with him, carry 30 per cent. or more of the voting rights in the Company; or
- (b) a person who, together with persons acting in concert with him, is interested in not less than 30 per cent. and not more than 50 per cent. of the voting rights in the Company acquires additional interests in shares which increase the percentage of shares carrying voting rights in which that person is interested,

the acquirer and, depending on the circumstances, its concert parties, would be required (except with the consent of the Takeover Panel) to make a cash offer for the outstanding shares at a price not less than the highest price paid for any interests in the shares by the acquirer or its concert parties during the previous 12 months.

When a person or members of a concert party hold or holds more than 50 per cent. of the voting rights in a company, no obligations under Rule 9 of the Takeover Code normally arise from acquisitions of further interests in shares by that person or concert party. Andrew Roberto Mankiewicz OBE, a Controlling Shareholder of the Company, will immediately following Admission hold 48.36 per cent of the voting rights of the Company via Tanglin Capital Limited. He may accordingly increase his aggregate interests in Ordinary Shares without incurring any obligation under Rule 9 of the Takeover Code to make an offer for all the Ordinary Shares in the Company. In the event that he increases his holding of Ordinary Shares, therefore, the other Shareholders will have no legal right to have an offer made for their Ordinary Shares, and are not afforded the protections of the Takeover Code in relation to the making of a Rule 9 offer.

Under the Takeover Code, a 'concert party' arises where persons who, pursuant to an agreement or understanding (whether formal or informal), co-operate to obtain or consolidate control (as defined below) of a company or to frustrate the successful outcome of an offer for a company. "**Control**" means holding or aggregate holdings, of shares carrying 30 per cent. or more of the voting rights of the Company, irrespective of whether the holding or holdings give de facto control. A person and each of its affiliated person will be deemed to be acting in concert with each other.

10.2 Disclosures

Shareholders are obliged to comply with the shareholding notification and disclosure requirements set out in Chapter 5 of the Disclosure Guidance and Transparency Rules. A Shareholder is required pursuant to Rule 5 of the Disclosure Guidance and Transparency Rules to notify the Company if, as a result of an acquisition or disposal of shares or financial instruments, the Shareholder's percentage of voting rights of the Company reaches, exceeds or falls below 5 per cent. of the nominal value of the Company's share capital or the threshold of 10 per cent., 15 per cent., 20 per cent., 25 per cent., 30 per cent., 50 per cent., or 75 per cent.

Shareholders are urged to consider their notification and disclosure obligations carefully as a failure to make a required disclosure to the Company may result in disenfranchisement.

10.3 Compulsory Acquisition

The Companies Law provides that if an offer is made for the shares or any class of shares in the capital of a company and if, within four months after the date of such offer, the offer is approved or accepted by shareholders comprising not less than 90 per cent. in value of the shares affected, then the offeror may, within a period of two months immediately after the threshold is reached, give notice to any dissenting shareholders informing them that it wishes to acquire their shares (an "**Acquisition Notice**"). Where an Acquisition Notice is given, the offeror is then entitled and bound to acquire the dissenting shareholders' shares on the terms of the offer approved by the shareholders comprising not less than 90 per cent. in value of the shares affected; and where the terms of the offer provided a choice of consideration, the Acquisition Notice must give particulars of the choice and state (i) the period within which, and the manner in which, the dissenting shareholder must notify the offeror of his choice and (ii) which consideration specified in the offer will apply if he does not so notify the offeror.

2 Basis of preparation

The financial statements have been prepared under the historical cost convention, modified to include certain items at fair value, and in accordance with IFRS UK.

1, Presentation of Financial Statements.

The functional and presentation currency of the Company Financial Information is Pounds Sterling.

The principal accounting policies are summarised below. They have all been applied consistently throughout the period.

Comparative figures

No comparative figures have been presented as the Company Financial Information covers the period from incorporation on 28 May 2021.

3 Significant accounting policies

The Company Financial Information is based on the following policies which have been consistently applied:

Financial assets

The Company's financial assets are cash and cash equivalents and other current assets. The classification is determined by management at initial recognition and depends on the purpose for which the financial assets are acquired.

The Company initially recognises receivables issued when the Company becomes a party to the contractual provisions of the instrument. Financial assets are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss.

Receivables are subsequently carried at amortised cost using the effective interest method. Amortised cost is the initial measurement amount adjusted for the amortisation of any differences between the initial and maturity amounts using the effective interest method. Loans and receivables are reviewed for impairment assessment.

Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less any bank overdrafts.

Other current assets

Debtors principally consist of prepayments which are carried at amortised cost.

The Company assesses at each end of the reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognised in profit or loss.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in profit or loss.

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership or has not retained control of the financial asset.

Financial liabilities

All financial liabilities are initially recognised on the trade date when the entity becomes party to the contractual provisions of the instrument.

Financial liabilities which includes trade and other payables and are recognised initially at fair value, net of directly attributable transaction costs. Financial liabilities are subsequently stated at amortised cost, using the effective interest method.

Financial liabilities are classified as current liabilities if payment is due to be settled within one year or less after the end of the reporting period (or in the normal operating cycle of the business, if longer), or the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period. Otherwise, these are presented as non-current liabilities.

Financial liabilities are derecognised from the statement of financial position only when the obligations are extinguished either through discharge, cancellation or expiration. The difference between the carrying amount of the financial liability derecognised and the consideration paid or payable is recognised in profit or loss.

Equity

Share capital represents the nominal value of shares that have been issued.

Equity-settled transactions are measured at fair value (excluding the effect of non market-based vesting conditions) at the date of grant. The fair value determined at the grant date of the equity-settled share-based payments is expensed on the date of grant.

Share premium includes any contributions from equity holders over and above the nominal value of shares issued. Any transaction costs associated with the issuance of shares are deducted from share premium.

Accumulated losses represent all current period results of operations as reported in the statement of profit or loss, reduced by the amounts of dividends declared.

Costs and expenses

Cost and expenses are recognised in profit or loss upon utilisation of goods or services or at the date they are incurred. All finance costs are reported in profit or loss on an accrual basis.

Taxation

The Company is liable to tax at the standard Guernsey rate of 0%.

Going concern

The Company Financial Information has been prepared using the going concern basis of accounting as the Directors are comfortable that on listing on the London Stock Exchange (and on release of funds from the Escrow account), the Company will receive a cash injection from its pre-IPO investors totalling £2,090,000(See note 11).

COVID-19

The directors continue to monitor the repercussions of the COVID-19 pandemic on any potential impact on the future financial performance of the Company. At the date of signing, whilst acknowledging that the pandemic is still active, the Directors do not believe that this will have a significant financial impact on the Company in the medium to long term which will prevent the Company from continuing to use the going concern basis of accounting.

Russia/Ukraine

The geopolitical situation in Eastern Europe intensified in late February 2022, with the commencement of Russia's military action against Ukraine. The Company has not been directly impacted by the current war in Ukraine nor by the sanctions imposed on the Russian Federation but may face inflationary pressure as a result of the worldwide impact on global economies.

Standards and interpretations issued and not yet effective:

A number of new standards and amendments to standards and interpretations have been issued but are not yet effective and, in some cases, have not yet been adopted by the UK. The Directors do not expect that the adoption of these standards will have a material impact on the Company Financial Information.

4 Critical accounting estimates and judgments

The preparation of the Company Financial Information requires the use of accounting estimates which, by definition, will seldom equal the actual results. Management also needs to exercise judgement in applying the Company's accounting policies. This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be adjusted due to estimates and assumptions turning out to be materially different when compared to actual results.

5 Earnings per Ordinary Share

Basic earnings per Ordinary Share is calculated by dividing the earnings attributable to Shareholders by the weighted average number of Ordinary Shares outstanding during the period. Diluted earnings per share is calculated by adjusting the weighted average number of Ordinary Shares outstanding to assume conversion of all dilutive potential Ordinary Shares. There are currently no dilutive potential Ordinary Shares.

Financial risk management objectives and policies

The Company is exposed to a number of risks arising from the financial instruments it holds. The main risks to which the Company is exposed are market risk, credit risk and liquidity risk. The risk management policies employed by the Company to manage these risks are discussed below as follows:

Market risk

Market risk is the risk that changes in market prices such as equity prices, interest rates and foreign exchange rates will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimising the return.

Price risk

The Company is not directly or indirectly exposed to any significant price risk.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Interest rate risk arises on interest-bearing financial instruments recognised in the Statement of Financial Position.

Cash and cash equivalents are interest bearing but not at significant levels.

Currency risk

The Company is not exposed to the risk that the exchange rate of its reporting currency relative to other foreign currencies may change in a manner that has an adverse effect on the fair value or future cash flows of the Company's financial assets or liabilities denominated in currencies other than GBP as all financial assets or liabilities are denominated in GBP.

Credit risk

Credit risk is the risk of financial loss to the Company if a counterparty fails to meet its contractual obligations. Credit risk arises from cash and cash equivalents as well as outstanding receivables.

The Company assesses all counterparties for credit risk before contracting with them. The credit risk on cash and cash equivalents is mitigated by entering into transactions with counterparties that are regulated entities subject to prudential supervision, with high credit ratings assigned by international credit rating agencies. Cash and cash equivalents are held with Barclays Bank plc, which at the year end was assigned a credit rating of A by Standard and Poor's rating agency.

The maximum exposure to credit risk is the carrying amount of the financial assets set out below.

Total credit risk exposure	<u><u>116,157</u></u>

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities. This risk can arise from mismatches in the timing of cash flows relating to assets and liabilities. The Company receives funding from the shareholders and does not have significant ad hoc expenses to settle. The only significant expense that the Company is exposed to are general operating expenses.

The table below analyses the Company's financial assets and liabilities into the relevant maturity groupings based on the remaining period at the reporting date. The amounts in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

PART 10

CONSEQUENCES OF A STANDARD LISTING

Application will be made for the Ordinary Shares to be admitted to a Standard Listing on the Official List pursuant to Chapter 14 of the Listing Rules, which sets out the requirements for Standard Listings. Listing Principles 1 and 2 as set out in Listing Rule 7.2.1 of the Listing Rules also apply to the Company, and the Company must comply with such Listing Principles. Premium Listing Principles 1 to 6 as set out in Listing Rule 7.2.1AR of the Listing Rules do not apply to the Company.

However, while the Company has a Standard Listing, it is not required to comply with the provisions of, *inter alia*:

- a. Chapter 8 of the Listing Rules regarding the appointment of a sponsor to guide the Company in understanding and meeting its responsibilities under the Listing Rules in connection with certain matters. The Company has not and does not intend to appoint such a sponsor in connection with the Placement and Admission;
- b. Chapter 9 of the Listing Rules relating to the ongoing obligations for companies admitted to the premium listing segment of the Official List, which therefore does not apply to the Company.
- c. Chapter 10 of the Listing Rules relating to significant transactions. It should be noted therefore that an Acquisition will not require Shareholder consent, even if Ordinary Shares are being issued as consideration for an Acquisition (subject to the Company having sufficient existing authorisation from Shareholders to issue such number of Ordinary Shares in relation to such Acquisition on a non-pre-emptive basis);
- d. Chapter 11 of the Listing Rules regarding related party transactions. Nevertheless, pursuant to LR14.3.25R the Company is obliged to comply with DTR 7.3 (related party transactions) which requires the Company to establish procedures to establish and maintain adequate procedures, systems and controls to enable it to assess whether a transaction or arrangement with a related party is in the ordinary course of business and has been concluded on normal market terms. There is also an announcement obligation for related party transactions of a material size, as more fully described in LR 14.3.25. Additionally, the Company will not enter into any transaction which would constitute a 'related party transaction' as defined in Chapter 11 of the Listing Rules without the specific prior approval of the independent Directors;
- e. Chapter 12 of the Listing Rules regarding purchases by the Company of its Ordinary Shares. In particular, the Company has not adopted a policy consistent with the provisions of Listing Rules 12.4.1 and 12.4.2. Until an Acquisition the Company will have unlimited authority to purchase Ordinary Shares, subject to the restrictions set out in the Companies Law; and
- f. Chapter 13 of the Listing Rules regarding the form and content of circulars to be sent to Shareholders.

THE UK CORPORATE GOVERNANCE CODE.

The Company is not currently eligible for a Premium Listing under Chapter 6 of the Listing Rules. Following an Acquisition, the Company's Standard Listing will be cancelled and the Company will be treated as a new applicant. At that point the Directors may seek admission as a Standard Listing or as a Premium Listing or another appropriate listing venue, based on the track record of the Company or business it acquires, subject to fulfilling the relevant eligibility criteria at the time. Alternatively, it may determine to seek re-admission to a Standard Listing, subject to eligibility criteria. If admission with a Premium Listing is possible (and there can be no guarantee that it will be) and the Company decides to seek a Premium Listing, the various Listing Rules highlighted above as rules with which the Company is not required to comply will become mandatory and the Company will comply with the continuing obligations contained within the Listing Rules (and the Disclosure Guidance and Transparency Rules) in the same manner as any other company with a Premium Listing. There can be no guarantee that once an Acquisition is completed and the Company loses its Standard Listing that it will be eligible for admission to any public market.

IT SHOULD BE NOTED THAT THE FCA WILL NOT HAVE THE AUTHORITY TO (AND WILL NOT) MONITOR THE COMPANY'S COMPLIANCE WITH ANY OF THE LISTING RULES WHICH THE COMPANY HAS INDICATED HEREIN THAT IT INTENDS TO COMPLY WITH ON A VOLUNTARY BASIS, NOR TO IMPOSE SANCTIONS IN RESPECT OF ANY FAILURE BY THE COMPANY SO TO COMPLY. HOWEVER, THE FCA WOULD BE ABLE TO IMPOSE SANCTIONS FOR NON-COMPLIANCE WHERE THE STATEMENTS REGARDING COMPLIANCE IN THIS PROSPECTUS ARE THEMSELVES MISLEADING, FALSE OR DECEPTIVE.

PART 12

TAXATION

TAXATION

The following information is based on Guernsey tax law, UK tax law and HMRC practice currently in force in the UK and Guernsey. Such law and practice (including, without limitation, rates of tax) is in principle subject to change at any time. The information that follows is for guidance purposes only. Any person who is in any doubt about his or her position should contact their professional advisor immediately.

UK Taxation

Tax treatment of the Company

The following information is based on the law and practice currently in force in the UK.

Provided that the Company is not resident in the UK for taxation purposes and does not carry out any trade in the UK (whether or not through a permanent establishment situated there), the Company should not be liable for UK taxation on its income and gains, other than in respect of interest and other income received by the Company from a UK source (to the extent that it is subject to the withholding of basic rate income tax in the UK).

It is the intention of the Directors to conduct the affairs of the Company so that the central management and control of the Company is not exercised in the UK in order that the Company does not become resident in the UK for taxation purposes. The Directors intend, insofar as this is within their control, that the affairs of the Company are conducted so the Company is not treated as carrying on a trade in the UK through a permanent establishment.

Tax treatment of UK investors

The following information, which relates only to UK taxation, is applicable to persons who are resident in the UK and who beneficially own Ordinary Shares as investments and not as securities to be realised in the course of a trade. It is based on the law and practice currently in force in the UK. The information is not exhaustive and does not apply to potential investors:

- who intend to acquire, or may acquire (either on their own or together with persons with whom they are connected or associated for tax purposes), more than 10 per cent., of any of the classes of shares in the Company; or
- who intend to acquire Ordinary Shares as part of tax avoidance arrangements; or
- who are in any doubt as to their taxation position.

Such Shareholders should consult their professional advisors without delay. Shareholders should note that tax law and interpretation can change and that, in particular, the levels, basis of and reliefs from taxation may change. Such changes may alter the benefits of investment in the Company.

Shareholders who are neither resident nor temporarily non-resident in the UK and who do not carry on a trade, profession or vocation through a branch, agency or permanent establishment in the UK with which the Ordinary Shares are connected, will not normally be liable to UK taxation on dividends paid by the Company or on capital gains arising on the sale or other disposal of Ordinary Shares. Such Shareholders should consult their own tax advisors concerning their tax liabilities.

Dividends

Where the Company pays dividends no UK withholding taxes are deducted at source, Shareholders who are resident in the UK for tax purposes will, depending on their circumstances, be liable to UK income tax or corporation tax on those dividends.

UK resident individual Shareholders who are domiciled in the UK, and who hold their Shares as investments, will be subject to UK income tax on the amount of dividends received from the Company.

Dividend income received by UK tax resident individuals will have a £2,000 annum dividend tax allowance. A Dividend receipts in excess of £2,000 will be taxed at 7.5 per cent. for basic rate taxpayers, 32.5 per cent. for higher rate taxpayers, and 38.1 per cent. for additional rate taxpayers.

Shareholders who are subject to UK corporation tax should generally, and subject to certain anti-avoidance provisions, be able to claim exemption from UK corporation tax in respect of any dividend received but will not be entitled to claim relief in respect of any underlying tax.

Disposals of Ordinary Shares

Any gain arising on the sale, redemption or other disposal of Ordinary Shares will be taxed at the time of such sale, redemption or disposal as a capital gain.

The rate of capital gains tax on disposal of Ordinary shares by basic rate taxpayers is 10 per cent, and for upper rate and additional is 20 per cent.

For Shareholders within the charge to UK corporation tax, indexation allowance up until 1 January 2018 may reduce any chargeable gain arising on disposal of Ordinary Shares but will not create or increase an allowable loss.

Subject to certain exemptions, the corporation tax rate applicable to its taxable profits is currently 19 per cent. and the rate will increase to 25 per cent. after 1 April 2023 for profits in excess of £250,000. Profits below £50,000 will continue to be taxed at 19 per cent., with profits between these values being subject to a marginal rate. The profit limits are reduced under certain circumstances and the 19 per cent. rate will not apply to close investment-holding companies.

“Transactions in securities”

The attention of Shareholders (whether corporates or individuals) within the scope of UK taxation is drawn to the provisions set out in, respectively, Part 15 of the Corporation Tax Act 2010 and Chapter 1 of Part 13 of the Income Tax Act 2007, which (in each case) give powers to HMRC to raise tax assessments so as to cancel “tax advantages” derived from certain prescribed “transactions in securities”.

Stamp Duty and Stamp Duty Reserve Tax ("SDRT")

No UK stamp duty or SDRT will be payable on the issue of the Ordinary Shares.

It is understood that the Ordinary Shares will be placed on a single share register in Guernsey. On that basis SDRT will not be payable on the consideration paid for the Ordinary Shares acquired using CREST, except in the unlikely event they are paired with UK corporate shares. Therefore, no duty will arise in the UK.

Investors holding paper Ordinary Shares will not be able to use the CREST clearance system. Provided the purchase of paper Ordinary Shares is executed using documents kept outside the UK, stamp duty will not be payable. The purchase of paper shares involving documents in the UK may in some circumstances be subject to Stamp Duty at 0.5 per cent. on the consideration paid for Ordinary Shares, if the purchase consideration exceeds £1,000.

The above comments are intended as a guide to the general stamp duty and SDRT position and may not relate to persons such as charities, market makers, brokers, dealers, intermediaries and persons connected with depositary arrangements or clearance services to whom special rules apply.

THIS SUMMARY OF UK TAXATION ISSUES CAN ONLY PROVIDE A GENERAL OVERVIEW OF THESE AREAS AND IT IS NOT A DESCRIPTION OF ALL THE TAX CONSIDERATIONS THAT MAY BE RELEVANT TO A DECISION TO INVEST IN THE COMPANY. THE SUMMARY OF CERTAIN UK TAX ISSUES IS BASED ON THE LAWS AND REGULATIONS IN FORCE AS OF THE DATE OF THIS DOCUMENT AND MAY BE SUBJECT TO ANY CHANGES IN UK LAWS OCCURRING AFTER SUCH DATE. LEGAL ADVICE SHOULD BE TAKEN WITH REGARD TO INDIVIDUAL CIRCUMSTANCES. ANY PERSON WHO IS IN ANY DOUBT AS TO HIS TAX POSITION OR WHERE HE IS RESIDENT, OR OTHERWISE SUBJECT TO TAXATION, IN A JURISDICTION OTHER THAN THE UK, SHOULD CONSULT HIS PROFESSIONAL ADVISOR.

- the business of the prescribed production of controlled drugs or their prescribed use in any production, processing, activity or other use, in each case under the authority of a licence issued by the Committee for Health & Social Care under MD Legislation; or
- the ownership of land and buildings situate in Guernsey.

It is not intended that the income of the Company will be derived from any of those sources.

Guernsey currently does not levy taxes upon capital, inheritances, capital gains, gifts, sales or turnover. No stamp duty or similar is chargeable in Guernsey on the issue, transfer or redemption of shares in the Company.

The Shareholders

The Company's dividends can be paid to a Shareholder who is not resident in Guernsey (which includes Alderney and Herm) for tax purposes without deduction of Guernsey income tax, provided such dividends by the Company are not to be taken into account in computing the profits of any permanent establishment in Guernsey through which such Shareholder, being an individual, carries on business in Guernsey.

A Shareholder who is resident in Guernsey (which includes Alderney and Herm) for Guernsey tax purposes, or who is not so resident but carries on business in Guernsey through a permanent establishment to which the holding of Shares is attributable, will incur Guernsey income tax at the applicable rate on dividends paid to that Shareholder by the Company. Where such a Shareholder is an individual, the Company is responsible for the deduction of tax from dividends and the accounting of that tax to the Director of the Revenue Service in Guernsey in respect of dividends paid by the Company to such Shareholder.

As already referred to above, Guernsey currently does not levy taxes upon capital, inheritances, capital gains, gifts, sales or turnover, nor are there any estate duties (save for registration fees and ad valorem duty for a Guernsey Grant of Representation where the deceased dies leaving assets in Guernsey which require presentation of such a Grant).

No stamp duty or similar tax is chargeable in Guernsey on the issue, transfer or redemption of shares in the Company.

FATCA and the CRS

Guernsey has enacted legislation that implements both FATCA and the CRS. This legislation obliges certain entities that are classified as "foreign financial institutions" ("**FFIs**") for FATCA purposes and/or "financial institutions" ("**FIs**") for CRS purposes, to carry out diligence and reporting in relation to certain Shareholders.

Whilst the Company is not expected to be a FFI for FATCA purposes or a FI for CRS purposes, there can be no guarantee in this regard and so the Company may be obliged to report certain information in respect of certain Shareholders and/or natural persons that control certain Shareholders. Further, the Company may be required to disclose to other FFIs or FIs certain information in respect of certain Shareholders and/or natural persons that control certain Shareholders.

If the Company is or becomes a FFI for FATCA purposes, then if the Company does not comply with the due diligence and reporting requirements under FATCA it could become subject to a 30 per cent. withholding tax on certain payments of US source income (including dividends and interest) and (from no earlier than two years after the date of publication of certain final regulations defining "foreign passthrough payments") a portion of non-US source payments from certain non-US financial institutions to the extent attributable to US source payments.

All prospective investors should consult with their respective tax advisors regarding the possible implications of FATCA, the CRS and any other similar legislation and/or regulations on their investments in the Company. If a Shareholder fails to provide the Company with information that is required by any of them to allow them to comply with any of the above reporting requirements, or any similar reporting requirements, adverse consequences may apply.

5. SUMMARY OF THE ARTICLES

The memorandum of incorporation of the Company does not restrict the objects of the Company; accordingly, for Guernsey legal purposes, the objects of the Company are unlimited. The following is a summary of certain provisions of the Articles.

The Articles, which were adopted on 30 July 2021, contain provisions, among others, to the following effect:

5.1 Dividends and other distributions

- 5.1.1 The Directors may from time to time authorise dividends and distributions to be paid to Shareholders in accordance with the requirements set out in the Companies Law and subject to any Shareholder's rights attaching to their shares.
- 5.1.2 The Ordinary Shares carry the right to receive all amounts available for distribution and from time to time to be distributed by way of dividend or otherwise in accordance with the Articles and such amounts shall be divided *pari passu* among the holders of Ordinary Shares in proportion to the number of Ordinary Shares held by them.
- 5.1.3 All unclaimed dividends or distributions may be invested or otherwise made use of by the Board for the benefit of the Company until claimed and the Company shall not be constituted a trustee in respect thereof. All dividends and distributions unclaimed for a period of twelve (12) years after having been declared or having become due for payment shall be forfeited and shall revert to the Company.

5.2 Voting

- 5.2.1 Subject to any special rights, restrictions or prohibitions as regards voting for the time being attached to any shares, holders of Ordinary Shares shall have the right to receive notice of and to attend and vote at general meetings of the Company. As of the date of Admission, there are no such special terms to note.
- 5.2.2 Each Shareholder being present in person or by proxy or by a duly authorised representative (if a corporation) at a meeting shall upon a show of hands have one vote and upon a poll each such holder present in person or by proxy or by a duly authorised representative (if a corporation) shall have one vote in respect of each Ordinary Share held.

5.2.3 Notwithstanding any other provisions of the Articles, where required by the Listing Rules, a vote must be decided by resolution of the holders of the Company's shares that have been admitted to a standard listing. In addition, where the Listing Rules require that a particular resolution must in addition be approved by the independent shareholders (as such term is defined in the Listing Rules) only independent shareholders who hold the Company's shares that have been admitted to a premium listing can vote on such separate resolution.

5.3 **Capital**

On a winding-up of the Company, the Ordinary Shares carry the right to receive a distribution of the surplus assets of the Company and such amounts shall be divided *pari passu* amongst the holders of Ordinary Shares in proportion to the number of Ordinary Shares held by them.

5.4 **Pre-emption rights**

5.4.1 There are no provisions of Guernsey law which confer rights of pre-emption in respect of the allotment and issue of shares.

5.4.2 However, the Articles provide that the Company is not permitted to allot and issue equity securities to a person on any terms unless it has made an offer to each person who holds Ordinary Shares in the Company to allot and issue to him on the same or more favourable terms a proportion of those securities that is as nearly as practicable equal to the proportion of Ordinary Shares held by such holder; and the period during which any such offer may be accepted has expired or the Company has received notice of the acceptance or refusal of every offer so made.

5.4.3 The pre-emption rights may be excluded and disapplied or modified by extraordinary resolution of the Shareholders. Further, the pre-emption rights shall not apply to:

- (a) the allotment and issue of equity securities prior to the Company's first Acquisition or in connection with the completion thereof (and including any such allotment and issue for the purposes of a fundraising contemporaneously with such Acquisition);
- (b) the allotment and issue of equity securities under an employees' share scheme; or
- (c) to a particular allotment and issue of equity securities if these are, or are to be, wholly or partly paid otherwise than in cash.

5.5 **Variation of rights**

5.5.1 Whenever the capital of the Company is divided into different classes of shares, the rights attached to any class of shares may (unless otherwise provided by the terms of issue of the shares of that class) be varied or abrogated:

- (a) with the consent in writing of the holders of more than 75 per cent. in value of the issued shares of that class (excluding any shares held as treasury shares); or
- (b) with the sanction of an extraordinary resolution passed at a separate meeting of the holders of the shares of that class.

5.5.2 The necessary quorum at any separate class meeting shall be two persons present holding or representing by proxy at least one-third of the voting rights of the issued shares of that class (excluding any shares held as treasury shares) (provided that if any such meeting is adjourned for lack of a quorum, the quorum at the reconvened meeting shall be one person present holding shares of that class or his proxy) provided always that where the class has only one member, that member shall constitute the necessary quorum and any holder of shares of the class in question may demand a poll.

- 5.5.3 The rights conferred upon the holders of any shares or class of shares issued with preferred, deferred or other rights shall (unless otherwise expressly provided by the conditions of issue of such shares) be deemed not to be varied by:
- (a) the creation or issue of further shares ranking *pari passu* therewith; or
 - (b) the purchase or redemption by the Company of any of its shares (or the holding of such shares as treasury shares).

5.6 Disclosure of interests in Shares

- 5.6.1 The Directors shall have power by notice in writing (a "**Disclosure Notice**") to require a Shareholder to disclose to the Company the identity of any person other than the Shareholder (an interested party) who has any interest (whether direct or indirect) in the Ordinary Shares held by the Shareholder and the nature of such interest or has been so interested at any time during the three years immediately preceding the date on which the Disclosure Notice is issued. Any such Disclosure Notice shall require any information in response to such Disclosure Notice to be given in writing to the Company within 28 days of the date of service (or 14 days if the shares concerned represent 0.25 per cent. or more of the number of Ordinary Shares in issue).
- 5.6.2 Chapter 5 of the Disclosure Guidance and Transparency Rules ("**DTR5**"), which has been incorporated into the Articles as if the Company were a "UK issuer" as such term is defined by DTR5, requires Shareholders to notify the Company if the voting rights attached to shares in the Company held by them (subject to certain exceptions as set out in DTR5) reach, exceed or fall below 3 per cent. and each 1 per cent. threshold thereafter up to 100 per cent. Pursuant to the Articles, the Company may also send a notice (a "**DTR Notice**") to any person whom it knows or believes to be interested in its shares, requiring such person to confirm whether he has such an interest and, if so, details of that interest.
- 5.6.3 Any Disclosure Notice, Information Notice or DTR Notice issued or served by the Company shall require any information in response to such notice to be given within the prescribed period (which is 28 days after service of the notice or 14 days if the Ordinary shares concerned represent 0.25 per cent. or more in number of the issued Ordinary Shares) or such other reasonable period as the Directors may determine.
- 5.6.4 If any Shareholder is in default in supplying to the Company the information required by the Company within the prescribed period the Directors in their absolute discretion may serve a direction notice on the Shareholder (a "**Direction Notice**"). The Direction Notice may direct that in respect of the Ordinary Shares in respect of which the default has occurred (the "**Default Shares**") and any other shares held by the Shareholder shall not be entitled to vote in general meetings or class meetings. Where the Default Shares represent at least 0.25 per cent. in number of the class of shares concerned, the Direction Notice may additionally direct that dividends on such Default Shares will be retained by the Company (without interest) and that no transfer of the Default Shares (other than a transfer authorised under the Articles) shall be registered until the default is rectified.
- 5.6.5 The Directors may be required to exercise their power to require disclosure of interested parties on a requisition of Shareholders holding not less than 1/10th of the total voting rights attaching to the Ordinary Shares in issue at the relevant time.
- 5.6.6 In addition to the rights referred to above, the Board may serve notice (an "**Information Notice**") on any Shareholder requiring that Shareholder to promptly provide the Company with any information, representations, documents, certificates or forms relating to such Shareholder (or its direct or indirect owners or account holders) that the Board determines from time to time are necessary or appropriate for the Company to:
- (a) satisfy any account or payee identification, documentation or other diligence requirements and any reporting requirements imposed under or relevant to AML legislation or any Tax

Reporting Regime that apply to the Company or any other entity in which the Company has an interest; or

- (b) avoid or reduce any tax otherwise imposed by Tax Reporting Regime (including any withholding upon any payments to such Shareholder by the Company); or
- (c) permit the Company to enter into, comply with, or prevent a default under or termination of, an agreement of the type described in section 1471(b) of the U.S. Tax Code or any equivalent under any Tax Reporting Regime.

5.6.7 Each Shareholder must also promptly notify the Company upon any change in circumstances that could affect the accuracy or correctness of the information, representations, documents, certificates or forms referred to above that have been provided by the Shareholder.

5.6.8 If any Shareholder (a "**Defaulting Shareholder**") is in default of supplying to the Company the information referred to above within the prescribed period (which shall not be less than 28 days after the service of the notice), or fails to comply with the obligation to keep information up-to-date that is referred to above, the Defaulting Shareholder shall be deemed to be a Non-Qualified Holder.

5.7 **Transfer of Shares**

5.7.1 Subject to the Articles (and the restrictions on transfer contained therein), a Shareholder may transfer all or any of his shares in any manner which is permitted by the Companies Law or in any other manner which is from time to time approved by the Board.

5.7.2 A transfer of a certificated share shall be in the usual common form or in any other form approved by the Board. An instrument of transfer of a certificated share shall be signed by or on behalf of the transferor and, unless the share is fully paid, by or on behalf of the transferee.

5.7.3 The Articles provide that the Board has power to implement such arrangements as it may, in its absolute discretion, think fit in order for any class of shares to be admitted to settlement by means of an uncertificated system. If the Board implements any such arrangements, any provision of the Articles will not apply or have effect to the extent that it is in any respect inconsistent with:

- (a) the holding of shares of the relevant class in uncertificated form; or
- (b) the transfer of title to shares of the relevant class by means of the relevant uncertificated system; or
- (c) the Regulations and Rules.

5.7.4 Where any class of shares is, for the time being, admitted to settlement by means of an uncertificated system such securities may be issued in uncertificated form in accordance with and subject to the Regulations and the Rules. Unless the Board otherwise determines, shares held by the same holder or joint holders in certificated form and uncertificated form will be treated as separate holdings. Shares may be changed from uncertificated to certificated form, and from certificated to uncertificated form, in accordance with and subject to the Regulations and the Rules. Title to such of the shares as are recorded on the register as being held in uncertificated form may be transferred only by means of the relevant uncertificated system.

5.7.5 The Board may, in its absolute discretion and without giving a reason, refuse to register a transfer of any share in certificated form or uncertificated form subject to the Articles which is not fully paid or on which the Company has a lien provided that this would not prevent dealings in the shares from taking place on an open and proper basis on the London Stock Exchange.

- 5.7.6 In addition, the Board may decline to transfer, convert or register a transfer of any share in certificated form or (to the extent permitted by the Regulations and Rules) uncertificated form: (a) if it is in respect of more than one class of shares; (b) if it is in favour of more than four joint transferees; (c) if applicable, if it is delivered for registration to the registered office of the Company or such other place as the Board may decide, not accompanied by the certificate for the shares to which it relates and such other evidence of title as the Board may reasonably require.
- 5.7.7 If any shares are owned directly, indirectly or beneficially by a person believed by the Board to be a Non-Qualified Holder, the Board may give notice to such person requiring him either:
- (a) to provide the Board within 30 days of receipt of such notice with sufficient satisfactory documentary evidence to satisfy the Board that such person is not a Non-Qualified Holder; or
 - (b) to sell or transfer his Shares to a person who is not a Non-Qualified Holder within 30 days and within such 30 days to provide the Board with satisfactory evidence of such sale or transfer and pending such sale or transfer, the Board may suspend the exercise of any voting or consent rights and rights to receive notice of or attend any meeting of the Company and any rights to receive dividends or other distributions with respect to such shares.

Where condition (a) or (b) is not satisfied within 30 days after the serving of the notice, if the Board in its absolute discretion so determines, the Company may dispose of the shares at the best price reasonably obtainable and pay the net proceeds of such disposal to the former holder.

5.8 **General meetings**

- 5.8.1 The first general meeting (being an annual general meeting) of the Company shall be held within such time as may be required by the Companies Law and thereafter general meetings (which are annual general meetings) shall be held at least once in each calendar year and in any event, no more than 15 months since the last annual general meeting. All general meetings (other than annual general meetings) shall be called extraordinary general meetings. Extraordinary general meetings and annual general meetings shall be held in Guernsey or such other place as may be determined by the Board from time to time.
- 5.8.2 The notice must specify the date, time and place of any general meeting and the text of any proposed special and ordinary resolution. Any general meeting shall be called by at least 14 clear days' notice. A general meeting may be deemed to have been duly called by shorter notice if it is so agreed by all the Shareholders entitled to attend and vote thereat. The accidental omission to give notice of a meeting to, or the non-receipt of notice of a meeting by, any person entitled to receive such notice shall not invalidate the proceedings at the meeting.
- 5.8.3 The Shareholders may require the Board to call an extraordinary general meeting in accordance with the Companies Law.
- 5.8.4 Subject to the requirements of the Companies Law, the Directors may make such arrangements as they may decide in connection with the facilities for participation by electronic means in a hybrid meeting, meaning a general meeting held and conducted by both physical attendance by Shareholders and/or proxies at a particular place and by Shareholders and/or proxies also being able to attend and participate by electronic means without needing to be in physical attendance at that place.

5.9 Restrictions on voting

- 5.9.1 Unless the Board otherwise decides, no Shareholder shall be entitled to vote at any general meeting or at any separate meeting of the holders of any class of shares in the Company, either in person or by proxy, in respect of any share held by him unless all calls and other sums presently payable by him in respect of that share have been paid. No Shareholder of the Company shall, if the Directors so determine, be entitled in respect of any share held by him to attend or vote (either personally or by representative or by proxy) at any general meeting or separate class meeting of the Company or to exercise any other right conferred by membership in relation to any such meeting if he or any other person appearing to be interested in such shares has failed to comply with a Disclosure Notice within 14 days, in a case where the shares in question represent at least 0.25 per cent. of their class, or within 28 days, in any other case, from the date of such Disclosure Notice. These restrictions will continue until the information required by the notice is supplied to the Company or until the shares in question are transferred or sold in circumstances specified for this purpose in the Articles.

5.10 Appointment, retirement and disqualification of Directors

- 5.10.1 Unless otherwise determined by the Shareholders by ordinary resolution, the number of Directors shall not be less than two and there shall be no maximum number.
- 5.10.2 A Director need not be a Shareholder. A Director who is not a Shareholder shall nevertheless be entitled to attend and speak at Shareholders' meetings.
- 5.10.3 Subject to the Articles, Directors may be appointed by the Board (either to fill a vacancy or as an additional Director). No person other than a Director retiring at a general meeting shall, unless recommended by the Directors, be eligible for election by the Company to the office of Director unless not less than seven and not more than 42 clear days before the date appointed for the meeting there shall have been left at the Company's registered office (or, if an electronic address has been specified by the Company for such purposes, sent to the Company's electronic address) notice in writing signed by a shareholder who is duly qualified to attend and vote at the meeting for which such notice is given of his intention to propose such person for election together with notice in writing signed by that person of his willingness to be elected and containing a declaration that he is not ineligible to be a Director in accordance with the Companies Law.
- 5.10.4 No person shall be or become incapable of being appointed a Director, and no Director shall be required to vacate that office, by reason only of the fact that he has attained the age of 70 years.
- 5.10.5 At each annual general meeting of the Company held after the Company's first Acquisition one-third ($\frac{1}{3}$) of the Directors for the time being, or if their number is not three (3) or a multiple of three (3), the number nearest to one-third ($\frac{1}{3}$), but not less than one-third ($\frac{1}{3}$), shall retire from office, provided that if a Director is an employee of the Company or of any subsidiary of the Company in any other capacity, he or she shall not, while he or she continues to hold that position or office, be subject to retirement by rotation and he or she shall not, in such case, be taken into account in determining the rotation or retirement of Directors. The Directors to retire in every year shall be those who have been longest in office since their last election, but as between persons who became Directors on the same day, those to retire shall, unless they otherwise agree among themselves, be determined by lot.
- 5.10.6 A Director who retires at an annual general meeting may, if willing to act, be re-appointed. If he is not re-appointed, he shall retain office until the meeting appoints someone in his place, or if it does not do so, until the end of the meeting.
- 5.10.7 The office of a Director shall be vacated:

- (a) if he (not being a person holding for a fixed term an executive office subject to termination if he ceases from any cause to be a Director) resigns his office by giving written notice signed by him sent to or deposited at the Company's registered office; or
- (b) if he dies; or
- (c) if he shall have absented himself (such absence not being absence with leave or by arrangement with the Board on the affairs of the Company) from meetings of the Board for a consecutive period of 12 months and the Board resolves that his office shall be vacated; or
- (d) if he becomes bankrupt or makes any arrangements or composition with his creditors generally; or
- (e) if he ceases to be a Director by virtue of, or becomes prohibited from being a Director by reason of, an order made under the provisions of any law or enactment; or
- (f) if he is requested to resign by written notice of all his co-Directors (being not less than two in number); or
- (g) if the Company by ordinary resolution shall declare that he shall cease to be a Director; or
- (h) if he becomes ineligible to be a Director in accordance with the Companies Law.

5.10.8 Any Director may, by notice in writing, appoint any other person who is willing to act as his alternate and may remove his alternate from that office.

5.10.9 Each alternate Director shall be eligible to be a Director under the Companies Law and shall sign a written consent to act. Every appointment or removal of an alternate Director shall be by notice in writing signed by the appointor and served upon the Company.

5.11 **Proceedings of the Board**

5.11.1 The Board may meet for the despatch of business, adjourn and otherwise regulate its meetings as it thinks fit. The quorum necessary for the transaction of the business of the Board may be fixed by the Board and unless so fixed shall be two. Subject to the Articles, a meeting of the Board at which a quorum is present shall be competent to exercise all the powers and discretion exercisable by the Board.

Tozai Holdings Disclosure

Andrew Roberto Mankiewicz OBE, consultant and Controlling Shareholder through Tanglin Capital Limited, was Chief Executive Officer of Tozai Holdings Inc. (“**Tozai Holdings**”), an investment and consultation services provider, incorporated in South Korea, during the period of 2008 - 2011. His role in the business was to focus on (a) attracting Korean companies to list overseas; and (b) advising Korean companies on overseas merger and acquisition transactions. Mr Mankiewicz was not involved in the day-to-day conduct of the business. Conduct of the business was managed by the directors of Tozai Holdings in Korea and no aspect of the work performed by Mr Mankiewicz or the business generally constituted at the relevant time, a regulated activity in South Korea.

In 2011, the Financial Supervisory Service (the “**FSS**”) in South Korea conducted a review of certain matters relating to Tozai Holdings, which ultimately resulted in disciplinary action being taken against Tozai Holdings due to a number of false invoices issued during the years 2008 – 2009, in the sums of KRW 898 million and KRW 1,415 million respectively (equivalent to approximately £556,000 and £876,000). The FSS issued a financial penalty in the sum of KRW 278.3 million (equivalent to approximately £172,000) to the company, as

well as a financial penalty in the sum of KRW 12 million (equivalent to approximately £7,430) to the individual who was Chief Executive Officer in 2011 (Mr Mankiewicz was not named, nor has he received any fines in relation to the matter) and recommended the dismissal of one of the then directors of Tozai Holdings. The company was also required to designate an auditor for three years, and make some corrections to its accounts. The interim accounts relating to 2011 later disclosed the resignation of Kang-hyeon Lee, in accordance with the FSS recommendation.

In September 2018, Mr Mankiewicz was presented with a Designation Notification. The Designation Notification was a notice letter, which informed him that he was the subject of investigation by the Seoul Gangnam Police Station for potential violation of the Tax Offender Penalty Act as a result of the FSS review of Tozai Holdings and his previous role. Following correspondence between the Seoul Central District Prosecutors' Office and Mr Mankiewicz's legal counsel, explaining his role and involvement with Tozai Holdings as well as his movements following the incident, a decision was taken by the Gangnam Tax Office that Mr Mankiewicz would not be charged.

In summary, Mr Mankiewicz who was based in Japan during the term of his appointment as Chief Executive Officer of the company, was not involved in either the day-to-day conduct of the business of the company or the issuance of false invoices. There have been no investigations, or proceedings brought against Mr Mankiewicz under the Korean Commercial Code or by Tozai Holdings in relation to the above matters, nor has he been personally criticised, fined or prosecuted in relation to the above events which took place.

Save as set out in this Prospectus, none of the Directors nor Mr Mankiewicz has any potential conflicts of interest between their duties to the Company and their private interests or other duties they may also have.
